Additive Runge-Kutta Schemes for Convection-diffusion-reaction Equations Christopher Alan Kennedy, 2001 Additive Runge Kutta ARK methods are investigated for application to the spatially discretized one dimensional convection diffusion reaction CDR equations First accuracy stability conservation and dense output are considered for the general case when N different Runge Kutta methods are grouped into a single composite method Then implicit explicit N 2 additive Runge Kutta ARK methods from third to fifth order are presented that allow for integration of stiff terms by an L stable stiffly accurate explicit singly diagonally implicit Runge Kutta ESDIRK method while the nonstiff terms are integrated with a traditional explicit Runge Kutta method ERK Coupling error terms are of equal order to those of the elemental methods Derived ARK methods have vanishing stability functions for very large values of the stiff scaled eigenvalue and retain high stability efficiency in the absence of stiffness
