of water's manifold roles in human society and the natural world throughout history. The hydrologic cycle is explained with attention to the properties and distribution of ice masses and the properties of oceans and rivers. Philosophical, mystical, metaphorical, and symbolic roles of water in literature, mythology, religion, the visual arts, and music are considered, as are individuals and organizations responsible for contributing to our understanding of water. Each entry concludes with a list of further readings. Attention is also paid to the philosophical, mystical, metaphorical, and symbolic role that water has played for humans in literature, mythology, religion, the visual arts, and music. Finally, a number of individuals and organizations that now make and have made important contributions to our understanding of water and its role in human life and in the natural world are included.

Wonders of the Sea Kendall Haven, 2005-07-30. Renowned storyteller Kendall Haven brings his expertise as an oceanographer to the authorship of this third book in a four-book series intended for teachers to use with students in the upper elementary and middle school grades. It focuses on natural phenomena of the sea: tides, tsunamis, sea spouts, giant squid, killer whales. Through the eyes of ancient myth and modern-day science, the book explains each myth using the interdisciplinary style of teaching Haven brings. His knowledge of the science of oceanography integrates various scientific fields of oceanic study: Physical Oceanography, Geologic Oceanography, Biological and Chemical Oceanography, etc. to further integrate science curricular areas with the study of myth. Students will not only be encouraged to appreciate the magic in myth and science but to understand the commonality of all human experience with nature over all time. The book contains myths from several different cultures along with accompanying scientific explanations to use with students. Included are bibliographies, recommended Web sites, student projects, and discussion and activity ideas. Illustrations and diagrams enhance student interest. The book is to be used by teachers and librarians with students and by students in libraries and classrooms. Grades 4-8.
