Meerloo's The Rape Of The Mind* Everest Media,2022-03-04T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The human mind is susceptible to political coercion In 1933 the German Reichstag building was burned to the ground and the Nazis arrested a Dutchman Marinus Van der Lubbe and accused him of the crime Van der Lubbe was known by Dutch psychiatrists to be mentally unstable 2 The trial of van der Lubbe showed the world the danger of systematized mental coercion in politics The world began to realize that the Bolsheviks had turned their old comrades into puppets and that they were being systematically changed into sheep 3 During the Second World War the Nazis forced confessions out of prisoners and those who were resistant or did not comply were subject to further torture We learned from this experience and decided that it was better not to be in touch with one another in order to avoid being betrayed 4 The Nazis used a variety of psychological strategies to break their prisoners from torture to playing the coward to confessing too much I had to flee Holland after a policeman warned me that my name had been mentioned in an interrogation **The Mind Is a Collection** Sean Silver,2015-10-28 John Locke described the mind as a cabinet Robert Hooke called it a repository Joseph Addison imagined a drawer of medals Each of these philosophers was an avid collector and curator of books coins and cultural artifacts It is therefore no coincidence that when they wrote about the mental work of reason and imagination they modeled their powers of intellect in terms of collecting cataloging and classification *The Mind Is a Collection* approaches seventeenth and eighteenth century metaphors of the mind from a material point of view Each of the book s six chapters is organized as a

series of linked exhibits that speak to a single aspect of Enlightenment philosophies of mind From his first chapter on metaphor to the last one on dispossession Sean Silver looks at ways that abstract theories referred to cognitive ecologies systems crafted to enable certain kinds of thinking such as libraries workshops notebooks collections and gardens In doing so he demonstrates the crossings over of material into ideal ideal into material and the ways in which an idea might repeatedly turn up in an object or a range of objects might repeatedly stand for an idea A brief conclusion examines the afterlife of the metaphor of mind as collection as it turns up in present day cognitive studies Modern cognitive theory has been applied to the microcomputer and while the object is new the habit is as old as the Enlightenment By examining lived environments and embodied habits from 1660 to 1800 Silver demonstrates that the philosophical dualism that separated mind from body and idea from thing was inextricably established through active engagement with crafted ecologies
