The Venture of Rational Faith Margaret Benson, 1908 **Rationality in Science, Religion, and Everyday Life** Mikael Stenmark, 2016-09-15 Mikael Stenmark examines four models of rationality and argues for a discussion of rationality that takes into account the function and aim of such human practices as science and religion **Rational Belief**, 1983 There is a tension between normative and descriptive elements in the theory of rational belief This tension has been reflected in work in psychology and decision theory as well as in philosophy Canons of rationality should be tailored to what is humanly feasible But rationality has normative content as well as descriptive content A number of issues related to both deductive and inductive logic can be raised Are there full beliefs statements that are just categorically accepted Should statements be accepted when they become overwhelmingly probable What is the structure imposed on these beliefs by rationality Are they consistent Are they deductively closed What parameters if any does rational acceptance depend on How can accepted

statements come to be rejected on new evidence Should degrees of belief satisfy the probability calculus Does conformity to the probability calculus exhaust the rational constraints that can be imposed on partial beliefs With the acquisition of new evidence should beliefs change in accord with Bayes theorem Are decisions made in accord with the principle of maximizing expected utility Should they be A systematic set of answers to these questions is developed on the basis of a probabilistic rule of acceptance and a conception of interval valued logical probability according to which probabilities are based on known frequencies This leads to limited deductive closure a demand for only limited consistency and the rejection of Bayes theorem as universally applicable to changes of belief It also becomes possible given new evidence to reject previously accepted statements

The Stability of Belief Hannes Leitgeb, 2017-03-24 In everyday life we normally express our beliefs in all or nothing terms I believe it is going to rain I don't believe that my lottery ticket will win In other cases if possible we resort to numerical probabilities my degree of belief that it is going to rain is 80% the probability that I assign to my ticket winning is one in a million It is an open philosophical question how all or nothing belief and numerical belief relate to each other and how we ought to reason with them simultaneously The Stability of Belief develops a theory of rational belief that aims to answer this question Hannes Leitgeb develops a joint normative theory of all or nothing belief and numerical degrees of belief While rational all or nothing belief is studied in traditional epistemology and is usually assumed to obey logical norms rational degrees of belief constitute the subject matter of Bayesian epistemology and are normally taken to conform to probabilistic norms One of the central open questions in formal epistemology is what beliefs and degrees of belief have to be like in order for them to cohere with each other The answer defended in this book is a stability account of belief a rational agent believes a proposition just in case the agent assigns a stably high degree of belief to it Leitgeb determines this theory's consequences for and applications to learning suppositional reasoning decision making assertion acceptance conditionals and chance The volume builds new bridges between logic and probability theory traditional and formal epistemology theoretical and practical rationality and synchronic and diachronic norms for reasoning

Putting Logic in its Place David Christensen, 2004-11-04 What role if any does formal logic play in characterizing epistemically rational belief Traditionally belief is seen in a binary way either one believes a proposition or one doesn't Given this picture it is attractive to impose certain deductive constraints on rational belief that one's beliefs be logically consistent and that one believe the logical consequences of one's beliefs A less popular picture sees belief as a graded phenomenon This picture explored more by decision theorists and philosophers of science than by mainstream epistemologists invites the use of probabilistic coherence to constrain rational belief But this latter project has often involved defining graded beliefs in terms of preferences which

may seem to change the subject away from epistemic rationality Putting Logic in its Place explores the relations between these two ways of seeing beliefs It argues that the binary conception although it fits nicely with much of our commonsense thought and talk about belief cannot in the end support the traditional deductive constraints on rational belief Binary beliefs that obeyed these constraints could not answer to anything like our intuitive notion of epistemic rationality and would end up having to be divorced from central aspects of our cognitive practical and emotional lives But this does not mean that logic plays no role in rationality Probabilistic coherence should be viewed as using standard logic to constrain rational graded belief This probabilistic constraint helps explain the appeal of the traditional deductive constraints and even underlies the force of rationally persuasive deductive arguments Graded belief cannot be defined in terms of preferences But probabilistic coherence may be defended without positing definitional connections between beliefs and preferences Like the traditional deductive constraints coherence is a logical ideal that humans cannot fully attain Nevertheless it furnishes a compelling way of understanding a key dimension of epistemic rationality *Uncertain Belief* David J. Bartholomew,2000 Do miracles happen Is the Bible true What about the paranormal Does God exist People ask these questions but there are no agreed answers At the rational level uncertainty is inevitable But is there enough evidence for a rational person to commit themselves to Christianity This book provides an answer **The Scientific Bases of Faith** Joseph John Murphy,1873 The Encyclopædia Britannica: A-ZYM Day Otis Kellogg,Thomas Spencer Baynes,1903 The Pentateuch and Book of Joshua John William Colenso,1873 **The Encyclopaedia Britannica** ,1875 **The Encyclopaedia Britannica** Day Otis Kellogg,Thomas Spencer Baynes,William Robertson Smith,1902
