The Chemistry Between Us Larry Young PhD, Brian Alexander, 2014-01-28 How much control do we have over love Much less than we like to think All that mystery all that poetry all those complex behaviors surrounding human bonding leading to the most life changing decisions we ll ever make are unconsciously driven by a few molecules in our brains How does love begin How can two strangers come to the conclusion that it would not only be pleasant to share their lives but that they must share them How can a man say he loves his wife yet still cheat on her Why do others stay in relationships even after the romance fades How is it possible to fall in love with the wrong person How do people come to have a type Physical attraction jealousy infidelity mother infant bonding all the behaviors that so often leave us befuddled are now being teased out of the fog of mystery thanks to today s social neuroscience Larry Young one of the world s leading experts in the field and journalist Brian Alexander explain how those findings apply to you Drawing on real human stories and research from labs around the world The Chemistry Between Us is a bold attempt to create a grand unified theory of love Some of the mind blowing insights include Love can get such a grip on us because it is literally an addiction To a woman falling in love a man is like her baby Why it s false to say society makes gender and how it s possible to have the body of one gender and the brain of another Why some people are more likely to cheat than others Why we sometimes truly can t resist temptation Young and Alexander place their revelations into historical political and social contexts In the process they touch on everything from gay marriage to why single mother households might not be good for society The Chemistry Between Us offers powerful insights into love sex gender sexual orientation and family life that will prove to be enlightening controversial and thought provoking

Totality and Beyond Robert Shapiro, 2015-10-15 The book you are about to read attempts to explain and to a degree put an order to existence You might reasonably ask What is the purpose The purpose is very simply this In order for you now to be able to function in a world of responsibilities well beyond your own physical life you need to be able to understand the functionality of creation and the confidence you need to have in simply emerging from seemingly nothing Nothing is not really zero Nothing is a matrix available to create something It will always be that and it has always been that This book will explain with some wide variety of points of view at times those points and over the next few hundred years you can consider them as you blend with your total being creating and re-creating what is now in order to bring it to a more benevolent state of being Ssjooooo September 18 2015 Chapters Include The Thirteen Envision the Worlds Within Worlds The Loop of Time An Unending Parade of Existence Disentanglement Disentangling Cords of Discomfort All Creation Responds to Need Every Action Has a Reaction It s Mother Nature s Plan Love and Care for Others to Embrace the Totality Feel Heat to Learn Oneness You Planned Your Journey The Reservoir of

Being Take Your Journey You Must Qualify for Physicality Beyond The Constant Motion of Totality **Faith seeking understanding** Nico Vorster, Frederik van Niekerk, 2023-03-01 How did it all begin How do we even start to engage the differences between creation narratives in the Christian Bible and modern scientific theory The authors of this book explore hermeneutic approaches and developments in biblical studies to set the scene for a religious approach This approach is open to the possibility that a literalist approach to Scripture is in fact the most unjustifiable reading of the Bible This may profoundly affect how we view God the cosmos and even ourselves To be able to read the Bible from the perspective of an open present and future paves the way for suppressed uncertainties to be liberated This paves the way for humankind to freely question all things without being enslaved by imposed religious dogma This is not to say that religion has served its purpose but it is far from it With the rise of technological advancements come other social and anthropological problems not to mention the challenge we face on a global scale with climate change et cetera Just as we dare to peek over the edge of a future without religion the authors bring us back to the fundamental teachings of faith traditions Christianity in particular They remind us that the solutions to these challenges are to be found in us becoming better humans Becoming better humans brings us back into the arena of faith traditions When technology may lead to social disconnection and narcissism religion calls for love of self and neighbour Where greed inspired advancements threaten the future of our planet religion teaches us to be in relationship with our environment and to be custodians of it Give God the Glory Augusta Emma Stetson, 1911
