Dembski (ed), 1998

Intelligent Design and Religion as a Natural Phenomenon John S. Wilkins, 2017-03-02 Over the past decade a strident public debate has arisen about the nature and origin of religions Controversies include how exactly religion evolved whether by individual or group selection if it is adaptive and if not whether and how it is a side effect of evolution This volume focuses on the issue of naturalizing religion on the ways in which cognitive science and social sciences have treated religion as a natural phenomenon It questions whether religious behaviour institutions and experiences can be explained in natural terms The editor brings together some of the best published work on the definition of religion intelligent design and the evolution of religion

Memory, Amnesia, and the Hippocampal System Neal J. Cohen, Howard Eichenbaum, 1993 In this sweeping synthesis Neal J Cohen and Howard Eichenbaum bring together converging findings from neuropsychology neuroscience and cognitive science that provide the critical clues and constraints for developing a more comprehensive understanding of memory Specifically they offer a cognitive neuroscience theory of memory that accounts for the nature of memory impairment exhibited in human amnesia and animal models of amnesia that specifies the functional role played by the hippocampal system in memory and that provides further understanding of the componential structure of memory The authors central thesis is that the hippocampal system mediates a capacity for declarative memory the kind of memory that in humans supports conscious recollection and the explicit and flexible expression of memories They argue that this capacity emerges from a representation of critical relations among items in memory and that such a relational representation supports the ability to make inferences and generalizations from memory and to manipulate and flexibly express memory in countless ways In articulating such a description of the fundamental nature of declarative representation and of the mnemonic capabilities to which it gives rise the authors theory constitutes a major extension and elaboration of the earlier procedural declarative account of memory Support for this view is taken from a variety of experimental studies of amnesia in humans nonhuman primates and rodents Additional support is drawn from observations concerning the neuroanatomy and neurophysiology of the hippocampal system The data taken from divergent literatures are shown to converge on the central theme of hippocampal involvement in declarative memory across species and across behavioral paradigms

Systematic Theology, Volume 1, Fourth Edition James Leo Garrett, 2014-09-14 Rivals the major systematic theologies of this century Baptist History and Heritage Journal July 1996 One of the characteristics of Garrett s system that needs especially to be noted is its balanced judicious and nearly invariably objective presentation of materials While holding true to the teachings of his own Baptist faith Garrett so carefully and judiciously presents alternatives that teachers and students from other

confessional and denominational positions will find his work instructive

Consensus 1997 If one is searching for an extensive exposition of the biblical foundations and historical developments of the various loci of systematic theology there is no more complete presentation in a relatively short work than this

Pastors will especially find this feature to be a real help in teaching theology It is an indispensable contribution to the task of systematic theology

Journal of the Evangelical Theological Society September 1999 Many students and pastors will find all they need here and will in addition be helped to relate their knowledge to recent developments in the theological world

The Churchman A Journal of Anglican Theology 1991 A gold mine of helpful material

The Christian Century May 29 June 5 1991 No book that I know is more loaded with biblical and theological facts than this one

The prodigious research that must have gone into the preparation of this volume is truly mind boggling

Faith and Mission Fall 1991 Garrett has provided a massive and scholarly systematic theology from a thoroughly conservative and comprehensive viewpoint

The work is well documented in both biblical and historical scholarship and will prove to be a classic

William Hendrickson Southern Baptist Theological Seminary One of the most comprehensive concise books of its type available it should receive wide use in the classroom and in the study

Robert H Culpepper Southern Baptist Theological Seminary

Creationism and Anti-Creationism in the United States Tom Kaden, 2018-09-20 This book deals with professional creationist and anti creationist organizations in America and describes how the conflict between science and religion is the result of the interaction between these two groups

It retraces their history from the 1960s onwards and identifies crucial turning points that led to new forms of creationism and anti creationism

It explains their strategies labels and arguments as effects of this history and structure

Taking a field theoretical approach the book avoids problems of prior creationism research making it possible to identify the mechanisms through which creationism generates new strategies arguments and media output

The field model is used as an interpretive tool to make sense of some of the most important creationist and anti creationist publications and media statements

Intelligent Design Robert M. Baird, Stuart E. Rosenbaum, 2007-07-31

On December 20 2005 Federal District Court Judge John E Jones III ruled that Intelligent Design was not science but an unconstitutional intrusion of religion into the school curriculum

His decision upheld contentions by parents in the Dover PA school district that school board members substituted personal religious beliefs for science

The ruling came despite calls by President George W Bush for Intelligent Design to be taught as a theory alongside the theory of evolution

This hotly contested issue continues to grip the nation and spark intense

debate But what is Intelligent Design Can Intelligent Design stand up to the rigors of scientific method Or is it a nonscientific faith inspired interpretation of experience This collection of essays addresses such questions and includes analyses from scientists journalists philosophers and religious leaders and thinkers This volume provides a variety of perspectives in the hope that readers will be better prepared to reach their own conclusions about the issues involved Divided into five sections the first section provides analyses of Judge Jones s decision Section two includes a report on and a response to President Bush s call for Intelligent Design to be taught in schools The third section outlines the origins of the debate including excerpts from the classic works of Charles Darwin and theologian William Paley Section four analyzes the scientific validity of Intelligent Design and includes statements from key scientific associations The highly important concluding section asks whether religion and evolution are compatible This essential volume features selections from Elisabeth Bumiller Matt Cartmill Charles Darwin Daniel C Dennett Barbara Forrest Owen Gingerich Stephen Jay Gould John Paul II Philip Kitcher Ernan McMullen Kenneth R Miller Nancey Murphy William Paley Robert T Pennock Holmes Rolston III Michael Ruse Alfred Tauber Michael W Tkacz James Q Wilson and Carl Zimmer

Intelligent Design William A. Dembski,1999 Explains the theory of intelligent design and explains how it can link science and theology by avoiding the traps of creationism and Darwinism

Intelligent Design Robert B. Stewart,2007 Leading intellectuals debate and explain the controversy over Intelligent Design in this text that explores the scientific religious and philosophical facets of the debate in a balanced fair and open minded format
