Every day the economic importance of national boundaries diminishes. The globalisation of world markets is proceeding with every increasing speed stimulated by developments such as the introduction of the single European currency and even the smallest transactions frequently now include a cross border element. Business executives and their advisers participating in a transaction need a clear and concise framework of understanding which will enable them to identify the critical issues likely to affect the course of the deal and to formulate the questions on which detailed advice will be needed. *Corporate Acquisitions and Mergers in Germany* provides a one stop guide to the practical issues involved for this jurisdiction. The following key topics are addressed: cultural aspects, regulatory framework, common financing methods, antitrust, competition aspects, taxation aspects, employment considerations, procedural formalities, accounting treatment of acquisitions and mergers and future developments. Professional advisers involved in merger and acquisition activity in Germany including bankers, independent lawyers or in house counsel, tax consultants, accountants, public relations advisers and actuaries will find *Corporate Acquisitions and Mergers in Germany* an invaluable and reliable source of practical reference and information. This volume originally appeared as a country report in the loose leaf work *Corporate Acquisitions and Mergers* edited by Peter Begg.

This book primarily deals with corporate restructuring through mergers and acquisitions. MAs critically examines all functions that must be performed in completing an MA transaction. Domestic and crossborder MAs are very similar in many respects even though differences between them also exist. The book includes discussions of international finance and multinational financial management the topics that arise in cross border MA transactions. Given the increasing importance of China as the second largest economy in the world and Chinese companies growing merger and acquisition MA activities globally we devote the last two chapters of the book to China's outward foreign direct investment and cross border MA activities. Moreover the second volume includes the case studies regarding Chinese foreign direct investment both in Greenfield and acquisition forms give additional insights into challenging tasks of due diligence and post merger cultural integration that foreign investors face. The MA literature is a fragmented field of inquiry. This book brings together important practical insights from this vast literature in a short but cohesive form that has high managerial relevance.
