the most recent modelling approaches The book begins with an introduction to metabolic mechanisms and to the metabolic regulation of a cell before moving on to discussing the action of global regulators in response to a specific culture environment The second half of the book examines conventional flux balance analysis and its applications ¹³C metabolic flux analysis and the effect of a specific gene knockout on the metabolism Comprehensive account of metabolic regulation via global regulators in response to changes in the culture environment Basic formulation of ¹³C metabolic flux analysis based on ¹³C labelling experiments Systems biology approach for the modelling and computer simulation of the main metabolic pathways of a cell system Pacific Medical Journal ,1915 Biology pamphlets. supplement ,1893
