Principles of Metabolic Control in Mammalian Systems Herman,2013-11-11 In this work we present the basic principles of metabolic control which we hope will serve as a foundation for the vast array of factual matter which the biochemist and the physician engaged in metabolic research must accumulate Accordingly we attempt to set forth these principles along with sufficient explanation so that the reader may apply them to the ever expanding literature of

biochemistry If we are successful this will provide a theoretical approach which can be applied to any given set of metabolic reactions It is impossible to enumerate each and every biochemical reaction and pathway since such a work would be too unwieldy for efficient use Rather we hope our presentation of the principles of metabolic control will be sufficiently basic to be of lasting usefulness no matter how detailed biochemistry may become We would like to be able to condense biochemistry into a theoretical biology that will not only allow for the general treatment of any given reaction but will enable predictions to be made as to the existence of necessary pathways and the consequences of altered control Such is not possible today but this may be accomplished in the future We believe it is now possible to institute the beginnings of such a theoretical biology

Metabolic Regulation B. R. Martin,1987 This book provides senior undergraduate and graduate students taking courses in biochemistry with an up to date description of the regulation of mammalian metabolism Emphasis is placed on the mechanisms involved an aspect which is poorly covered by existing texts The book is divided into three sections the first two of which describe in detail the mechanisms by which the metabolism of a cell is regulated by both internal and external factors In the last section these molecular mechanisms are related to physiological regulation of individual tissues and the integration of the response of individual tissues to changes in the state of the whole organism Metabolic Regulation M.
