Metatony In Baltic:

Metatony in Baltic Rick Derksen, 1996 During the past decades Balto Slavic accentology has become increasingly important for the reconstruction of Proto Indo European This study tries to provide an explanation for the phenomenon of metatony in Baltic i e the phenomenon that in certain Baltic forms a morpheme shows the reflex of the Balto Slavic circumflex intonation where we would expect the reflex of the acute intonation m tatonie douce or vice versa m tatonie rude The subject necessarily involves an inquiry into the origin of the Lithuanian and Latvian tone systems Furthermore it requires the assessment of a large number of etymologies In the final chapter of the book the developments which are considered to be relevant to the rise of metatony are incorporated into a relative chronology The investigation is based on a comprehensive collection of data including evidence from Lithuanian and Latvian dialects and Old Lithuanian In comparison with earlier studies on the subject the Latvian evidence plays an essential role This book tries to demonstrate that the value of Latvian data for Balto Slavic accentology has hitherto not been fully recognized *Introduction to Proto-Indo-European and Balto-Slavic Accentology* Roman Sukac, 2014-07-03 This book offers a comprehensive introduction to Proto Indo European Balto Slavic and Proto Slavic accentology a branch of diachronic linguistics dealing with the development of syllable stress intonation and quantity at the word level Of particular interest in the book is its detailed summary of the major approaches and solutions to accentology of the last thirty years Furthermore the book provides a comprehensive overview of the current state of research on accentuation of the Indo European proto language and the accentuation of Balto Slavic languages Such research is integral to our knowledge of how accentual patterns developed from the reconstructed proto language to the modern Indo European languages [The Rise of Acuteness in Balto-Slavic](#) Miguel Villanueva Svensson, 2023-09-25 The development of the prosodic system from Indo European to Balto Slavic is dominated by two major innovations the rise of mobility and the rise of acuteness This book provides a new account of the latter It stands out from previous works for being informed by recent advances in phonological typology and tonogenesis and especially for its comprehensiveness All matters related to the rise of acuteness are treated in detail As a result the book includes new insights on several issues of Balto Slavic historical phonology and morphology as well **Accent Matters** , 2011-01-01 The accentual systems of the Baltic and Slavic languages continue to intrigue scholars of general and historical linguistics They play an important role in the reconstruction of the linguistic ancestor of Baltic and Slavic but also in the typological study of accentual systems This volume contains contributions related to the accentology of the Baltic and Slavic languages by leading scholars in the field They discuss the accentual systems that are attested in Baltic and Slavic dialects and texts and the historical developments that led to these systems The volume further contains contributions on similar accentual systems and developments in other languages such as Abkhaz and the Mordvinian languages A number of papers also deal with the role of the Balto Slavic accents in the reconstruction of Proto Indo European The volume reflects the progress that has been made in the field of

Baltic and Slavic accentuation during the last decades It forms a major source for anyone interested in the latest developments and insights in the study of accentuation *Indo-European Studies Bulletin* ,1998 The Historical Morphology of the Baltic Verb William R. Schmalstieg,2000 The purpose of this book is to suggest a possible scenario for the history of Baltic verbal morphology with relatively little attention to semantics and syntax The various stages of development from a reconstructed Proto Indo European verbal system to the attested systems of the extant Baltic languages are proposed Various innovative theories of the author and other contemporary specialists in Baltic historical linguistics are discussed and evaluated in many cases making available the results of their work available in English for the first time In addition to a large bibliography on the Baltic verb the book is supplied with an index of each word form discussed *Linguistica Baltica* ,2001

Balto-Slavic Accentual Mobility Thomas Olander,2009 Why does the accent jump back and forth in Russian words like golov head acc g lovü gen golov dat golov etc How come we find similar alternations in other Slavic languages and in a Baltic language like Lithuanian The quest for the origin of the so called mobile accent paradigms of Baltic and Slavic leads the reader through other Indo European language branches such as Indo Iranian Greek and Germanic all of which are relevant to the reconstruction of the Proto Indo European accentuation system After the examination of the evidence for the reconstruction of the Proto Indo European accentuation system focus is moved to the Baltic and Slavic accentuation systems and their relationship to each other and to Proto Indo European A comprehensive history of research and numerous bibliographical references to earlier pieces of scholarship throughout the book make it a useful tool for anybody who is interested in Balto Slavic and Indo European accentology Written in a simple style and constantly aiming at presenting old and new opinions on the various problems the volume may serve as an introduction to this complicated field Per Aspera Ad Asteriscos Adam Hyllested,2004 *Amsterdamer Beiträge Zur Älteren Germanistik* ,1998 **Of All the Slavs My Favorites** Victor A. Friedman,Donald Leroy Dyer,2001 *Nominal Accentuation in Baltic and Slavic* Vladislav Markovich Illich-Svitych,1979 *SSGL* Thomas Olander,Jenny Helena Larsson,1980 **Martynas Mažvydas and Old Lithuania** Domas Kaunas,Regina Koženiauskienė,1998 *Accent in Hittite* Alwin Kloekhorst,2014 Although it is usually stated that nothing is known about accent in Hittite in the last decades various bits and pieces of information about its accent system have come about This book provides for the first time a systematic treatment of all these sources of information the interplay between accent and vowels plene vs non plene spelling the interplay between accent and consonants lenition and fortition and the interplay between accent and clauses clitics and metrics The result is a full description of the synchronic Hittite accent system its internal diachronic development as well as its Indo European origins The book is concluded by a word list in which the phonological interpretation of all treated words is given including the place of their accent One of the conclusions of this book is that the accent system of Hittite is similar to and sometimes even more archaic than the accent systems of its cognates Ancient Greek and Vedic Sanskrit and thus provides a totally new and unique source of information

for the reconstruction of Proto Indo European accent This book is therefore not only of interest to Hittitologists but certainly also to Indo Europeanists Moreover the methodology that is used in this book for extracting accentological information out of texts written in the cuneiform script may also provide a working tool for scholars interested in the accent systems of other cuneiform languages

Baltica & Balto-Slavica Frederik Herman Henri Kortlandt,2009 This volume offers a discussion of the phonological accentological and morphological development of the Baltic languages and their Indo European origins The first half of this book is about Baltic historical phonology and morphology and the second half is about Prussian The emphasis is on the relative chronology of sound changes and on the development of the flexional and derivational categories of nouns pronouns and verbs It is argued that the Balto Slavic acute tone was a glottal stop which developed from the Indo European laryngeals and from Winter s law and that the original circumflex continues other vocalic sequences Special points of attention are the gen pl endings and j stems and thematic and athematic present endings The second half of the book contains a comparative analysis of the three Prussian catechisms resulting in the conclusion that they represent three consecutive stages of a real linguistic system It includes a discussion of the Prussian accent shift initial vowels diphthongs infinitives verb classes participles and traces of ablauting paradigms The final part of the book offers a full linguistic interpretation of the three Prussian catechisms on the basis of the preceding chapters followed by a list of references and a word index The book is of interest to Balticists Slavicists Indo Europeanists and other historical linguists
