## **Partial Differential Equations With Multiple Characteristics:**

*Partial Differential Equations with Multiple Characteristics* Maria Mascarello, Luigi Rodino, 1997-11-03 This book is devoted to the general theory of partial differential equations with multiple characteristics The methods of the microlocal analysis are reviewed and used to prove recent results on local solvability hypoellipticity propagation of singularities in the frame of Sobolev spaces Schwartz distributions and Gevrey ultradistributions The Cauchy problem is also considered **On Cauchy's Problem for Partial Differential Equations with Multiple Characteristics** Anneli Lax, Augustin Louis Baron Cauchy, 1956 **Existence and Uniqueness Theorems for Partial Differential Equations with Multiple Characteristics** Marvin Zeman, 1974 , **Advances in Pseudo-Differential Operators** Ryuichi Ashino, Paolo Boggiatto, Man-Wah Wong, 2012-12-06 The Fourth Congress of the International Society for Analysis its Applications and Computation ISAAC was held at York University from August 11 2003 to August 16 2003 It was supported by the Academic Initiative Fund of the Faculty of Arts NSERC grants from some members of the Department of Mathematics and Statistics and the Office of the Vice President Academic of York University In spite of two SARS outbreaks in Toronto in 2003 the ISAAC Congress was held as scheduled and was well attended by mathematicians from all over the world There were nine plenary lectures and seventeen special sessions representing most major themes in analysis Among these were two plenary lectures and a special session on pseudo differential operators organized by Ryuichi Ashino of Osaka Kyoiku University Paolo Boggiatto of Universite di Torino and M W Wong of York University In the summer of 2003 M W Wong had the idea of putting together the lectures on pseudo differential operators in a volume to be published in a series that advocates operator theory and its applications In early August of 2003 when Israel Gohberg of Tel Aviv University was consulted about the possibility of publishing a volume entitled *Advances in Pseudo Differential Operators* in his series *Operator Theory Advances and Applications* he replied immediately endorsing the proposal enthusiastically **Recent Advances in Operator Theory and Its Applications** Israel Gohberg, 2005-09-16 This book contains a selection of carefully refereed research papers most of which were presented at the fourteenth International Workshop on Operator Theory and its Applications IWOTA held at Cagliari Italy from June 24 27 2003 The papers many of which have been written by leading experts in the field concern a wide variety of topics in modern operator theory and applications with emphasis on differential operators and numerical methods The book will be of interest to a wide audience of pure and applied mathematicians and engineers *Microlocal Analysis and Spectral Theory* Luigi Rodino, 2012-12-06 The NATO Advanced Study Institute Microlocal Analysis and Spectral Theory was held in Tuscany Italy at Castelvecchio Pascoli in the district of Lucca hosted by the international vacation center 11 Ciocco from September 23 to October 3 1996 The Institute recorded the considerable progress realized recently in the field of Microlocal Analysis In a broad sense Microlocal Analysis is the modern version of the classical Fourier technique in solving partial differential equations where now the localization proceeding takes place with respect to the dual variables

too Precisely through the tools of pseudo differential operators wave front sets and Fourier integral operators the general theory of the linear partial differential equations is now reaching a mature form in the frame of Schwartz distributions or other generalized functions At the same time Microlocal Analysis has grown up into a definite and independent part of Mathematical Analysis with other applications all around Mathematics and Physics one major theme being Spectral Theory for Schrodinger equation in Quantum Mechanics

**Progress In Analysis, Proceedings Of The 3rd Isaac Congress (In 2 Volumes)** Heinrich G W Begehr, Robert Pertsch Gilbert, Man-wah Wong, 2003-08-04 The biannual ISAAC congresses provide information about recent progress in the whole area of analysis including applications and computation This book constitutes the proceedings of the third meeting

*Abstract And Applied Analysis - Proceedings Of The International Conference* Nguyen Minh Chuong, Louis Nirenberg, Wolfgang Tutschke, 2004-06-01 This volume takes up various topics in Mathematical Analysis including boundary and initial value problems for Partial Differential Equations and Functional Analytic methods Topics include linear elliptic systems for composite material the coefficients may jump from domain to domain Stochastic Analysis many applied problems involve evolution equations with random terms leading to the use of stochastic analysis The proceedings have been selected for coverage in Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings CC Proceedings Engineering Physical Sciences

*Partial Differential Equations* Todor V. Gramchev, Petar R. Popivanov, 2000-02-22 The applications of methods from microlocal analysis for PDE have been a fast developing area during the last years The authors both are well known in the community publish for the first time some of their research results in a summarized form The essential point of the approach is the use of the various types of approximate asymptotic solutions in the study of differential equations in the smooth and the Gevrey spaces In this volume the authors deal with the following themes Microlocal properties of pseudodifferential operators with multiple characteristics of involutive type in the framework of the Sobolev spaces Abstract schemes for constructing approximate solutions to linear partial differential equations with characteristics of constant multiplicity  $m$  greater than or equal 2 in the framework of Gevrey spaces Local solvability hypoellipticity and singular solutions in Gevrey spaces Global Gevrey solvability on the torus for linear partial differential equations Applications of asymptotic methods for local non solvability for quasihomogeneous operators Applications of Airy asymptotic solutions to degenerate oblique derivative problems for second order strictly hyperbolic equations Approximate Gevrey normal forms of analytic involutions and analytic glancing hypersurfaces with applications for effective stability estimates for billiard ball maps
