Strategic management is the management of an organization's resources to achieve its goals and objectives Strategic management involves setting objectives analysing the competitive environment analysing the internal organization evaluating strategies and ensuring that management rolls out the strategies across the organization This book helps in Key Takeaways Companies universities non profits and other organizations can use strategic management as a way to make goals and meet objectives Flexible companies may find it easier to make changes to their structure and plans while inflexible companies may chafe at a changing environment A strategic manager may oversee strategic management plans and devise ways for organizations to meet their benchmark goals Strategic management is divided into several schools of thought A prescriptive approach to strategic management outlines how strategies should be developed while a descriptive approach focuses on how strategies should be put into practice These schools differ on whether strategies are developed through an analytic process in which all threats and opportunities are accounted for or are more like general guiding principles to be applied Business culture the skills and competencies of employees and organizational structure all important factors that influence how an organization can achieve its stated objectives Inflexible companies may find it difficult to succeed in a changing business environment Creating a barrier between the development of strategies and their implementation can make it difficult for managers to determine whether objectives have been efficiently met While an organization's upper management is ultimately responsible for its strategy the strategies are often sparked by actions and ideas from lower level managers and employees An organization may have several employees devoted to strategy rather than relying solely on the Chief Executive Officer CEO for guidance This book even help the companies to find ways to be more competitive is the purpose of strategic management To that end putting strategic management plans into practice is the most important aspect of the planning itself

Plans in practice involve identifying benchmarks realigning resources financial and human and putting leadership resources in place to oversee the creation sale and deployment of products and services In business strategic management is important because it allows a company to analyze areas for operational improvement In many cases they can follow either an analytical process which identifies potential threats and opportunities or simply follow general guidelines Given the structure of the organization a company may choose to follow either a prescriptive or descriptive approach to strategic management Under a prescriptive model strategies are outlined for development and execution By contrast a descriptive approach describes how a company can develop these strategies Hungarian Foreign Trade ,1967 Journal of the Senate of the State of South Carolina, Being the Sessions of ...
