artists to chronicle the geography and culture of a civilization that had until then been shrouded in mystery A central focus of the book is the artwork itself which provides a window into the diplomatic artistic and scientific viewpoints underlying the mission Drawing on archival research the study recreates the processes through which the Embassy s draughtsmen scientists and diplomats collaborated to represent the visual images and how the materials were reworked for publication in London The finished product demonstrates that the artists offered a distinct viewpoint in the representation of China sometimes differing from the textual accounts by blending scientific elements and artistic aesthetics in order to demystify China and make it more knowable to a British audience It was in the interposition of text and image that the British public formulated an ambivalent perception of China that embraced both admiration and disdain In addition to the scholars the book targets general readers who are interested in global art and history and East West interactions It contains important images with detailed visual and historical analysis that enable readers to acquire knowledge on how the British represented China and how that image helped to shape the European perception of China during the British global expansion in the eighteenth and nineteenth centuries and beyond
