## **Metaphysics Its Structure And Function:**

**Metaphysics** Stephan Körner, 1984-09-06 This is an ambitious and substantial study of metaphysics its nature and inescapability Professor Körner's method may be described as philosophical anthropology and aims to arrive at a characterisation of the metaphysical beliefs with which we have to operate Professor Körner begins by describing how the categorical framework of a person's metaphysical beliefs may be embedded in more ordinary beliefs and practical attitudes to the world He illustrates the variety of such frameworks and describes their role going on to explain how they may be modified by argument and reflection This is an independent inquiry but also the culmination of a series of Professor Körner's earlier works The writing is extremely clear and the material sensitively controlled revealing great learning and many suggestive insights and comparisons It presents overall a comprehensive and carefully thought out account of metaphysics

**Metaphysics** Stephan Körner, 1984      **Dictionary of Twentieth-Century British Philosophers** Stuart Brown, 2005-06-01 This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture      **The Relations of Structural and Functional Psychology to Philosophy**

physics and philosophy     *Defuturing* Tony Fry, 2020-08-20 Once one understands the nature and magnitude of defuturing as the negation of world futures how one has to account for the history and making of the material world including design dramatically changes Defuturing as our condition forces the generation of a new philosophy of design With these thoughts this book presents a radically new understanding of the history context and futures of designing First published in 1999 now reissued with a new preface by the author Defuturing A New Design Philosophy is a prescient and powerful account of what it means to comprehend that we live in world that is taking away futures for ourselves and non human others Arguing that designing is doubly implicated in this process first in its roles in helping to create the unsustainable but second re thought through the lens of defuturing as a mode of acting in the world that can help contest the negation of the world Defuturing transforms our comprehension of designing and of how futures can be constituted Working not through abstract theorizing but through the analysis of concrete examples the book uses historical material on design to expose the archaeology of defuturing Shattering the illusion that the future simply is Defuturing confronts designing with the challenge of remaking while offering the elements of a new practical reasoning of design acting     Investigations Representing the Departments University of Chicago, 1903     **The Philosophical Review** Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1903 An international journal of general philosophy     **Understanding Hermeneutics** Lawrence Kennedy Schmidt, 2016-04-15 This series provides short accessible and lively introduction to the major schools movements and traditions in philosophy and the history of ideas since the beginning of the Enlightenment All books in the series are written for undergraduates meeting the subject for the first time Hermeneutics concerns itself with the theory of understanding and the interpretation of language The question of how to correctly interpret and understand others remains one of the most contested branches of philosophy In *Understanding Hermeneutics* Lawrence Schmidt provides an introduction to modern hermeneutics through a systematic examination of the ideas of its key philosophical proponents Chapter 1 examines the ideas of the Protestant theologian Friedrich Schleiermacher who argues that misunderstanding is always possible so we must always employ interpretation if we are to understand correctly Chapter 2 discusses the ideas of Dilthey who maintains that understanding in the humanities is fundamentally different from explanation in the natural sciences and who presents a methodology to judge what another person means or feels by means of their language and also their gestures facial expressions and manners of acting Chapter 3 explores the ideas of Heidegger who radicalizes the concept by shifting its focus from interpreting texts to an existential interpretation of human being In Chapter 4 the recent ideas of Gadamer are examined which extend to examining the structures of hermeneutic experience and to question the supremacy of the natural sciences as models for truth The final chapters consider some of the criticisms and controversies surrounding hermeneutics including the work of Habermas Hirsch Ricoeur and Derrida and the prospects for the future of hermeneutics     **The Decennial Publications** , 1903     *The Calendar* University of Calcutta, 1929     **The Continuum**
