evaluate whether heightened enforcement efforts have contributed to reducing the flow of undocumented migrants it is critical to estimate the number of border crossing attempts during the same period for which apprehensions data are available With these issues in mind DHS charged the National Research Council NRC with providing guidance on the use of surveys and other methodologies to estimate the number of unauthorized crossings at the U S Mexico border preferably by geographic region and on a quarterly basis Options for Estimating Illegal Entries at the U S Mexico Border focuses on Mexican migrants since Mexican nationals account for the vast majority around 90 percent of attempted unauthorized border crossings across the U S Mexico border **La Industria Del Petroleo en Mexico** José Colomo, Gustavo Ortega, 1927
