## ABSTRACT

Carnitine functions as a substrate for a family of enzymes, carnitine acyltransferases, involved in acyl-coenzyme A metabolism and as a carrier for long-chain fatty acids into mitochondria. Carnitine biosynthesis and/or dietary carnitine fulfill the body's requirement for carnitine. To date, a genetic disorder of carnitine biosynthesis has not been described. A genetic defect in the high-affinity plasma membrane carnitine-carrier<sub>in</sub> leads to renal carnitine wasting and primary carnitine deficiency. Myopathic carnitine deficiency could be due to an increase in efflux moderated by the carnitine-carrier<sub>out</sub>. Defects in the carnitine transport system for fatty acids in mitochondria have been described and are being examined at the molecular and pathophysiological levels. The nutritional management of these disorders includes a high-carbohydrate, low-fat diet and avoidance of those events that promote fatty acid oxidation, such as fasting, prolonged exercise, and cold. Large-dose carnitine treatment is effective in systemic carnitine deficiency.

Clinical Nutrition and Dietetics  
 Frances J. Zeman, 1983

Abstract: A textbook presents an integration of the theoretical basis for nutritional care with other relevant biologic sciences to provide the dietetics student with the background for increasing independence in planning nutritional care. The material is intended for students who already have completed rigorous courses in biochemistry and normal physiology. Following a discussion of the general principles of pathology, nutritional care, and the interactions of drugs and nutrition, a systematic approach is used in addressing pathologic conditions and relevant nutritional care. Two special sections cover disorders which result in enhanced nutrient needs and the nutrition-related problem areas of energy balance and body weight disorders and handicapping conditions. Abundant tables and schematics are given throughout the text, and numerous appendices provide definitions, weight/height recommendations, therapeutic diet information, and other information. w/z
