Does Science Need a Global Language? Scott L. Montgomery,2024-05-31 In early 2012 the global scientific community erupted with news that the elusive Higgs boson had likely been found providing potent validation for the Standard Model of how the universe works Scientists from more than one hundred countries contributed to this discovery proving beyond any doubt that a new era in science had arrived an era of multinationalism and cooperative reach Globalization the Internet and digital technology all play a role in making this new era possible but something more fundamental is also at work In all scientific endeavors lies the ancient drive for sharing ideas and knowledge and now this can be accomplished in a single tongue English But is this a good thing In *Does Science Need a Global Language* Scott L. Montgomery seeks to answer this question by investigating the phenomenon of global English in science how and why it came about the forms in which it appears what advantages and disadvantages it brings and what its future might be He also examines the consequences of a global tongue considering especially emerging and developing nations where research is still at a relatively early stage and English is not yet firmly established Throughout the book he includes important insights from a broad range of perspectives in linguistics history education geopolitics and more Each chapter includes striking and revealing anecdotes from the front line experiences of today s scientists some of whom have struggled with the reality of global scientific English He explores topics such as student mobility publication trends world Englishes language endangerment and second language learning among many others What he uncovers will challenge readers to rethink their assumptions about the direction of contemporary science as well as its future

Philosophy: What It Is and Why We Need It , A National Program of Institutional Grants for Science and Science Education, a Study for the Subcommittee on Science, Research, and Development...prepared by the Science Policy Research, and Development...prepared by the Science Policy Research Division, Legislative Reference Service, Library of Congress, Serial R. Citizen Science and Social Innovation: Mutual Relations, Barriers, Needs, and Development Factors Andrzej Klimczuk,2022-03-21 Abstract Social innovations are usually understood as new ideas initiatives or solutions that make it possible to meet the challenges of societies in fields such as social security education employment culture health environment housing and economic development On the one hand many citizen science activities serve to achieve scientific as well as social and educational goals Thus these actions are opening an arena for introducing social innovations On the other hand some social innovations are further developed adapted or altered after the involvement of scientist supervised citizens laypeople or volunteers in research and with the use of the citizen science tools and methods such as action research crowdsourcing and community

based participatory research Such approaches are increasingly recognized as crucial for gathering data addressing community needs and creating engagement and cooperation between citizens and professional scientists However there are also vari
