Fisher, J.H. Wandersee, D.E. Moody, 2006-04-11 Mapping Biology Knowledge addresses two key topics in the context of biology promoting meaningful learning and knowledge mapping as a strategy for achieving this goal Meaning making and meaning building are examined from multiple perspectives throughout the book In many biology courses students become so mired in detail that they fail to grasp the big picture Various strategies are proposed for helping instructors focus on the big picture using the need to know principle to decide the level of detail students must have in a given situation The metacognitive tools described here serve as support

systems for the mind creating an arena in which learners can operate on ideas They include concept maps cluster maps webs semantic networks and conceptual graphs These tools compared and contrasted in this book are also useful for building and assessing students content and cognitive skills The expanding role of computers in mapping biology knowledge is also explored

**Missing the Meaning** A. Peacock,A. Cleghorn,2004-02-20 Missing the Meaning investigates recent evidence that school text materials are more problematic than previously imagined Difficulties with language illustrations design and cultural mismatch are highlighted and ways in which young students read books and electronic materials in classrooms are compared through contributions from researchers across five continents The book suggests new ways to develop and use text so that the materials are better matched to the diverse needs of teachers and students The implications of this collection are wide applying not only to teachers but to teacher educators educational publishers software developers and policy makers
