Permar,2015-03-14 If you ve ever stared in awe at the Rocky Mountains and wondered how early travelers could possibly traverse those peaks then this is the book for you In a time of smartphones GPS devices and voice automated navigation systems it s difficult to imagine crossing unknown desserts mountains and prairies with just a few ancient techniques and the heavens above This history of movement across the American West brings three centuries of travel to life It shows how four different cultures in four different areas migrated across this harsh and beautiful land the native travelers on foot Spanish conquistadors on horseback Frenchmen by canoe and American settlers by wagon In this history the who where and when take a back seat to the fascinating how How did they find their way from place to place How did they measure time distance and direction traveled How did they provide themselves with food water and

shelter the barest necessities of human existence Travel the myth and reality of the raw land that made the American West Discover the depth of human bravery determination and ingenuity And enjoy the adventure Destined for Distinguished Oblivion Nicholas J. Wade,2012-12-06 My first encounter with the name of William Charles Wells over twenty years ago was an oblique reference to his Essay upon single vision that Wheatstone 1838 made in a classical article on binocular vision The reference was enigmatic because it stated that few had paid attention to Wells theory of visual direction while doing little to inform the reader of its novelty I was fortunate in having the excellent facility of the Rare Books and Manuscripts Department of the Library at the University of St Andrews near at hand so that I could consult a copy of Wells monograph However I was not aware of the full import of its contents until Hiroshi Ono visited Dundee from York University Ontario in 1980 Hiroshi had previously formalised the principles of binocular visual direction that Hering 1879 had proposed He returned one day from St Andrews having read Wells Essay upon single vision amazed to have found that Wells had performed similar experiments and reached similar conclusions to Hering Hiroshi Ono has done much to bring Wells work on binocular single vision to the notice of visual scientists although its reception has not been without opposition As I read more of Wells work on vision I became aware of its breadth as well as its depth In addition to his essay on binocular single vision he wrote about and conducted experiments on accommodation visual acuity visual persistence and vertigo The World in a Crucible Sally Newcomb,2009-01-01 Geology coalesced as a discipline in the early part of the nineteenth century with the coming together of many strands of investigation and thought The theme of experimentation and or instrument aided observation is absent from most recent accounts of that time which rely on an admixture of theory and field observations informed by close examination of minerals James Hutton emerged as the person who had it right with suggestion of a central heat source for Earth while Abraham Gottlob Werner and his Neptunist supporters were derided as being blinded by overarching belief as opposed to sober application of observed facts However despite several claims that Hutton had won the day primary literature from both England and the Continent reveals that the question was by no means settled for decades after Hutton derided information derived from looking into a little crucible This Special Paper makes the case that it was just those parameters of heat pressure solution and composition discovered in the laboratory that prevented resolution of the overriding questions about rock origin **AB Bookman's Weekly** ,1998 The Daguerreian Annual ,2004 *The Story of Time* Kristen Lippincott,1999 Tentoonstellingscatalogus over de cultuurgeschiedenis van tijd en tijdmeting de voorstelling van tijd in de beeldende kunst en tijdsbesef in verschillende perioden en culturen *Journal for the History of Astronomy* ,2000 **Cumulative Bibliography of Victorian Studies** ,1970 The Journal of Medieval and Early Modern Studies ,1999 *Nuncius* ,2005 Annali di storia della scienza *Current Contents* Institute for Scientific Information (Philadelphia),1999
