Scientific And Technological Communication:

Scientific and Technological Communication Sidney Passman, 2013-10-22 *Scientific and Technological Communication* deals with the fundamental aspects of the elements and media of scientific and technological communication with emphasis on the critical issues involving them as well as the opportunities and techniques for exploiting them Topics covered include informal information exchange specialized information and analysis centers mechanization and information handling and international aspects of scientific and technical communication This book is comprised of nine chapters and begins with an overview of the scientific communication process its evolution and its elements as well as the importance of the scientific literature to the integrity correctness and viability of this process The following chapters explore the social role of the scientific literature in establishing priority of effort with respect to the research and engineering process primary and secondary literature on scientific and technological communication including scientific journals monographs and technical reports informal information exchange and specialized information and analysis centers The final chapter is devoted to the international aspects of scientific and technical communication This monograph will be a useful resource for scientific and technical practitioners as well as users generators and managers of communication systems in private and government sectors

Designing a National Scientific and Technological Communication System Russell L. Ackoff, 2015-09-30 Contributors Russell L Ackoff Martin C J Elton Thomas A Cowan James C Emery Peter Davis Marybeth L Meditz Wladimer M Sachs With the collaboration of William C Donovan Mohammad Jahani and Jonathan V Rosenhead *Encyclopedia of Science and Technology Communication* Susanna Hornig Priest, 2010-07-14 In the academic world the term science communication refers both to a set of professions such as science journalism and public information work and to an interdisciplinary scholarly research specialization Much of this research is aimed at improving our understanding of the best ways to communicate complex information especially to people who are not scientists Science communication specialists are concerned with giving people useful information about health environment and technology as well as science itself In order to do this we also need to improve our understanding of how people think form opinions and process information Additionally professional practitioners in science communication are engaged in strategic and ethical decisions every day such as How should reporters cover the issue of climate change Should the views of scientists who do not believe that climate change has been caused by human activity be included alongside the views of those who do in order to give a balanced story or does this mislead the public into thinking that both of these positions are equally accepted within the scientific community The *Encyclopedia of Science and Technology Communication* provides information on the entire range of interrelated issues in this interdisciplinary field in one place along with clear suggestions on where to begin the search for more Geared towards undergraduate and graduate students in journalism communication mass communication and media studies as well as towards working journalists public information officers and public relations specialists this encyclopedia introduces this vast

fascinating field while challenging the reader to question assumptions inherent in communication across disciplinary boundaries Key Themes Associations and Organizations Audiences Opinions and Effects Challenges Issues and Controversies Changing Awareness Opinion And Behavior Critical Influences and Events Global and International Aspects Government Agencies US History Philosophy and Sociology of Science Important Figures Journal Publications Key Cases and Current Trends Law Policy Ethics and Beliefs Major Infrastructural Initiatives Practices Strategies and Tools Professional Roles and Careers Public Engagement Approaches Theory and Research Venues and Channels *Scientific and Technical Communication, a Pressing National Problem and Recommendations for Its Solution* Committee on Scientific and Technical Communication,1969 Report on problems of scientific and technical information and documentation services in the USA discusses recommendations for the improvement of the efficiency of such systems and covers the use of computer aided research methods incl Planning and coordination at national level international cooperation etc library functions technical aspects legal aspects trends the role of international organizations etc Bibliography pp 307 to 317 Scientific and Technological Communication in the Government United States. Department of Commerce. Office of Technical Services,PRESIDENT'S SCIENCE ADVISORY COMMITTEE WASHINGTON DC.,1963 **Communicating Science and Technology in Post-Covid-19 Era** Felix Babatunde Ale,2021-02-01 Research Paper postgraduate from the year 2020 in the subject Communications Technical Communication language English abstract The objective of this paper is to investigate the need for effective communication of science and technology in the post Covid 19 era The disruption as a result of the pandemic has affected social economic political and technological systems across the globe Communicating science and technology provides people with the clear accurate and factual information that are required to respond effectively to the current disruption of systems and with the emergence of the Second Wave of the Coronavirus pandemic The World Health Organization six principles appears to be the most suitable strategy to communicate science and technology in this era The Framework has six principles states that a communication should be accessible actionable credible and trusted relevant timely and understandable The systems approach is the preferred methodology where a complex science and technology information is broken into small constituent parts and communicated more clearly The strategy will make it simpler for journalists science communicators or writers to be more effective in carrying out their mandates as public educators and informants Communicating Science and Technology in Society Ana Delicado,Fabienne Crettaz Von Roten,Katarina Prpić,2020-11-22 This volume addresses the engagement between science and society from multiple viewpoints At a time when trust in experts is being questioned misinformation is rife and scientific and technological development show growing social impact the volume examines the challenges in involving the public in scientific debates and decisions It takes into account societal needs and concerns in research and analyses the interface between the roles of institutions and individuals From environmental challenges to science communication participatory technological design to animal experimentation and

transdisciplinarity to norms and values in science the volume brings together research on areas in which scientists and citizens interact across diverse often understudied socio cultural contexts in Europe It encompasses the natural sciences engineering and the social sciences and the chapters follow diverse theoretical frameworks and methodologies including both quantitative and qualitative approaches This volume contributes not just to scholarly knowledge on the topic of science and society relations but also provides useful information for students policy makers journalists and STEM science technology engineering and mathematics researchers keen on engaging with their publics and conducting responsible research and innovation

Handbook of Public Communication of Science and Technology Massimiano Bucchi, Brian Trench, 2008-06-03 Comprehensive yet accessible this key Handbook provides an up to date overview of the fast growing and increasingly important area of public communication of science and technology from both research and practical perspectives As well as introducing the main issues arenas and professional perspectives involved it presents the findings of earlier research and the conclusions previously drawn Unlike most existing books on this topic this unique volume couples an overview of the practical problems faced by practitioners with a thorough review of relevant literature and research The practical Handbook format ensures it is a student friendly resource but its breadth of scope and impressive contributors means that it is also ideal for practitioners and professionals working in the field Combining the contributions of different disciplines media and journalism studies sociology and history of science the perspectives of different geographical and cultural contexts and by selecting key contributions from appropriate and well respected authors this original text provides an interdisciplinary as well as a global approach to public communication of science and technology

Communication Andrew Solwey, 2009-08-07 Examines advancements in communications technology including historical information the development of satellites and television the impact of the internet and cell phones and the future of telecommunication

Scientific and Technical Communication James H. Collier, David M. Toomey, 1997 *Scientific and Technical Communication* is a major textbook that represents a new focus area in communication studies It integrates multidisciplinary perspectives on the relations among rhetoric science technology and public policymaking to the process and product of technical communication The text is inspired by science and technology studies STS a field emerging from the history sociology and philosophy of science and technology which also has roots in economics political theory and rhetoric Reformulating the issues raised by STS within the context of technical communication *Scientific and Technical Communication* is composed of three highly integrated parts Part I provides a summary critique and alternative to recent theoretical perspectives developed in the rhetoric of science and the sociology of scientific knowledge Part II applies these critical alternatives to the traditional practices of scientific and technical communication and shows how these new practices can be applied to the communication that is vital in forming national and local science and technology policy This hands on introductory textbook will supply students and professionals in the areas of scientific and technical communication rhetoric and media studies with broad

based and applicable knowledge in this area

Communication and Engagement with Science and Technology John K. Gilbert, Susan M. Stockmayer, 2012-11-27 Science communication seeks to engage individuals and groups with evidence based information about the nature outcomes and social consequences of science and technology This text provides an overview of this burgeoning field the issues with which it deals important influences that affect it the challenges that it faces It introduces readers to the research based literature about science communication and shows how it relates to actual or potential practice A Further Exploration section provides suggestions for activities that readers might do to explore the issues raised Organized around five themes each chapter addresses a different aspect of science communication Models of science communication theory into practice Challenges in communicating science Major themes in science communication Informal learning Communication of contemporary issues in science and society Relevant for all those interested in and concerned about current issues and developments in science communication this volume is an ideal text for courses and a must have resource for faculty students and professionals in this field *Exploring Science Communication* Ulrike Felt, Sarah R. Davies, 2020-01-27 Exploring Science Communication demonstrates how science and technology studies approaches can be explicitly integrated into effective powerful science communication research Through a range of case studies from climate change and public parks to Facebook museums and media coverage it helps you to understand and analyse the complex and diverse ways science and society relate in today s knowledge intensive environments Notable features include A focus on showing how to bring academic STS theory into your own science communication research Coverage of a range of topics and case studies illustrating different analyses and approaches Speaks to disciplines across Media Communication Science Technology Studies Health Sciences Environmental Sciences and related areas With this book you will learn how science communication can be more than just about disseminating facts to the public but actually generative leading to new understanding research and practices *Communication and Popularization of Science and Technology in China* Fujun Ren, Jiequan Zhai, 2013-11-12 This book aims to be a reference for researchers studying the promotion of scientific literacy in China as well as a guide for those interested in promoting scientific awareness It covers advances in science and technology communication and popularization practice and research STCP both in China and abroad Theoretical issues are discussed and important problems in promoting scientific and technological awareness are identified e g basic principles structures channels of communication and current needs This book provides a summary of the advances in STCP in China in recent years especially after the issuing of the National Scientific Literacy Outline including STCP resource and capacity building science popularization policies practitioner development infrastructure construction and the development of the science popularization industry as a whole At the same time this book also reviews the design organization monitoring and evaluation of science and technology communication and popularization programs It also highlights current STCP trends and developments in China and calls for a greater emphasis to be placed on research into

promoting scientific literacy It is hoped that this book will be useful to readers both in China and abroad by familiarizing them with the history and theory of STCP as well as its development over time The 1st chapter briefly reviews the history of STCP The 2nd through 5th chapters discuss the conceptual framework basic structure methods of communication and current STCP needs The 6th chapter introduces the principle content of programs aimed at improving Chinese citizens scientific literacy while the 7th and 8th chapters analyze the resources capacities and conditions that have been developed for STCP in China The 9th chapter investigates the organization monitoring and evaluation of science popularization practices and the final chapter summarizes important STCP topics and trends in contemporary China
