*Logical and Spiritual Reflections* Avi Sion, 2008-04-15 *Logical and Spiritual Reflections* is a collection of six shorter philosophical works including Hume's Problems with Induction A Short Critique of Kant's Unreason In Defense of Aristotle's Laws of Thought More Meditations Zen Judaism No to Sodom [Between Science and The Soul: An Oncologist's Reflections on Faith, Fear, and the Fight Against Cancer](#) Dr Vedant Kumar Modi, 2025-09-18 *The God the Oncologist and the Patient* is a deeply human exploration of cancer that brings science compassion and spirituality together in one gentle conversation Rather than treating illness as a purely clinical event the book recognizes how cancer reshapes timelines families faith and identity and offers reassurance through every stage of uncertainty Structured as a calm step by step dialogue the book walks readers from the moment of diagnosis through complex decisions caregiving and the search for meaning Each chapter blends clinical clarity with lived stories practical checklists with reflection and medical insight with spiritual wisdom ensuring that no reader feels lost or abandoned [Religion and Science in Context](#) Willem B. Drees, 2009-09-10 How should we think about religion science and their relationship in modern society Some religious groups oppose evolution some atheists claim science is on their side Others reconcile their beliefs with science or consider science and faith to deal with fundamentally different aspects of human life What indeed is religion belief or trust in God's existence How do we distinguish sense from superstition What does science have to say on such issues Willem B Drees considers contemporary discussions of these issues in Europe and North America using examples from Christianity and religious naturalism and reflections on Islam and Tibetan Buddhism He argues that the scientific understanding leaves open certain ultimate questions and thus allows for belief in a creator but also for religious naturalism or serious agnosticism By analysing the place of values in a world of facts and the quest for meaningful stories in a material world *Religion and Science in Context* offers an original and self critical analysis of the field its assumptions and functions and ends with a vision of its possible future **John Paul II on Science and Religion** Robert J. Russell, William R. Stoeger, George V. Coyne, 1990 **Modern Science and Modern Thought** Samuel Laing, 1896 **Science and Religion United** Ulrich A. K. Betz, 2024-05-30 This book offers a fresh perspective on how science and religion are connected and how prayer aligns with the laws of nature It explores a holistic worldview where science and religion complement each other shedding light on life society and philosophical and societal concerns We are born into a world full of mysteries that we only partially understand We don't know where we are coming from we don't know why we live and we don't know where we will go We don't know how everything started we even don't know what everything really is We are living in an era of rapid change marked by disruptive technologies like artificial intelligence and computers Combined with a perception that the old wisdom transferred to us by religion is outdated traditional values and institutions that had worth and power over many centuries are now losing their appeal Science has made remarkable progress but can't answer life's most profound questions about our origins purpose and destination why do we live and what should we do In

this book the author begins with an overview of science our understanding of the universe highlighting gaps in our knowledge like what started the Big Bang followed by examples of successful scientific achievements and insights into the limits of science In the subsequent chapters the author examines topics such as mind over matter and the coexistence of evolution creation natural laws and miracles An attempt to answer the theodicy question is also provided in this book where the author connects new scientific discoveries with ancient religious wisdom The book concludes with a chapter devoted to innovation and a call for building a better world This book is a compelling read for scholars professionals and curious laymen alike ready to expand their horizons
