Challenging Units for Gifted Learners Kenneth J. Smith, Susan Stonequist, 2021-09-03 Gifted students have the potential to learn material earlier and faster to handle more complexity and abstraction and to solve complex problems better. This potential however needs stimulating experiences from home and school or it will not unfold. These books are designed to help teachers provide the stimulating curricula that will nurture this potential in school. The units presented in this series are based on research into how these students actually think differently from their peers and how they use their learning styles and potential not merely to develop intellectual expertise but to move beyond expertise to the production of new ideas. The Math book includes units that ask students to develop a financial portfolio that includes high and low risk stocks, options, and margins, AAA and junk bonds, mutual funds, and money markets; use math, science, engineering, technology, and art to design and build a miniature golf course; develop games based on probability; and run a real life small business. Grades 6-8

Scissors, Paper, Rock Fenton Johnson, 2016-02-09 Two generations of a Kentucky family struggle with loss and reunion in a novel by a Lambda Award winner. Brilliant emotional jolts lurk on every page. Entertainment Weekly. Despite the emotional distance that has long existed between them, Raphael Hardin has left San Francisco to care for his dying father in his rural Kentucky hometown. Raphael had finally made a life for himself in California, away from the tiny Appalachian town of Strang Knob, but now that life is threatened by an AIDS diagnosis. As father and son reunite, the story moves to Raphael's siblings: among them, an alcoholic brother haunted by guilt and a sister beset by loneliness, as well as Miss Perkins, an unmarried schoolteacher who has known the Hardins for decades, painting a portrait of a family and a community of blood struggles, broken hearts, and binding loves. Powerfully moving. New York Times Book Review. A seductive rumination on the ways that memory can torment or soothe and sometimes do both at the same time. San Francisco Chronicle. A wise and compassionate novel. Publishers Weekly.

Never Too Old to Teach Neil M. Goldman, 2009 *Never Too Old to Teach* is a heart warming story of a middle aged man's first year of teaching high school after spending twenty years in a corporate cubicle. Written in a humorous straightforward style with minimal technical jargon, this book provides richly detailed accounts of events, lessons, and conversations that actually took place in the author's special education English classroom. Goldman's accounts are accompanied by narratives and reflections that give the reader insight into the true nature of teaching high school English to a diverse student body with learning disabilities, covering issues such as maintaining classroom control, effective curriculum development, collaboration with families for positive student outcomes, successfully working with administration, the benefits of teaching in middle age, and establishing student rapport.

Between Never and Always Margie Singer, 2004 Introduction to Turbo Pascal and Software Design Nell B. Dale, Chip Weems, 1995 *New York Court of Appeals. Records and Briefs*. New York (State)., *Mathematics Activities for Elementary School Teachers* Daniel Thomas Dolan, Dolan, 1993 *This is Gail* Juliette O'Brien, 2016-02-01 An inspiring story of one woman's journey through heartbreaking loss to renewal and new purpose. In 2008, inspirational surgeon Chris O'Brien published his bestselling memoir of his battle with brain cancer, NEVER SAY DIE. But he wasn't the only person in the O'Brien household with a powerful story to tell. Since Chris passed away in 2009, his wife Gail has gone on a journey of her own, from a busy surgeon's wife and mother of a picture perfect family to a widow in her mid 50s, grieving not only her husband but also her son Adam, who died as a result of epilepsy a short time after Chris's death. Yet in the midst of her grief, Gail discovered resolve and strength deep within herself. When Chris was alive, Gail was the woman behind the great man. But after his death, she stepped forward to make her own mark on the world. While coming to terms with both a public and private loss, Gail took on Chris's legacy as steward of the Chris O'Brien Lifehouse cancer centre, navigating the often bruising politics of boards and committees to ensure his vision was realised. She also went back to work as a physio after being out of the workforce for 20 years while still holding her shattered family together. She reinvented herself and found that she could survive and even thrive in a world without her soul mate. A moving, inspiring, deeply poignant and often joyous story of family love and loss, and ultimately about finding your purpose in the world.
