Scotlands Changing Lands:

Land Reform in Scotland Annie Tindley, Jayne Glass, Malcolm Combe, 2020-02-03 This interdisciplinary analysis of Scotland's perennial political hot potato the Scottish land question follows the latest legislative development The Land Reform Scotland Act 2016 Bringing together leading academics and professional experts working in law history and policy Land Reform in Scotland delves into issues from the early modern period to present day Individual chapters discuss some areas such as property theory and human rights which have been under studied in relation to land reform

Understanding Land-Use and Land-cover Change in Global and Regional Context Elena Milanova, 2005-01-08 Most of the papers of this book were presented in the IGU LUCC 2003 Moscow Workshop on Global and Regional Land Use Cover Changes and at International Conference Society and Environment Interaction Under Global and Regional Changes which was held in Barnaul Altai Russia in summer 2003 *Scotland's Populations from the 1850s to Today* Michael

Anderson, 2018-03-01 Scotland's Populations is a coherent and comprehensive description and analysis of the most recent 170 years of Scottish population history With its coverage of both national and local themes set in the context of changes in Scottish economy and society this study is an essential and definitive source for anyone teaching or writing on modern Scottish history sociology or geography Michael Anderson explores subjects such as population growth and decline rural settlement and depopulation and migration and emigration It sets current and recent population changes in their long term context exploring how the legacies of past demographic change have combined with a history of weak industrial investment employment insecurity deprivation and poor living conditions to produce the population profiles and changes of Scotland today While focussing on Scottish data Anderson engages in a rigorous treatment of comparisons of Scotland with its neighbours in the British Isles and elsewhere in Europe which ensures that this is more than a one country study

This book delves into Scotland's evolving food system uncovering the challenges of change tracing food policy progress since devolution in 1999 and envisioning bold strategies for the next 25 years Food system transformation is a key global challenge for this century This challenge is evident in Scotland where plentiful food co exists with food insecurity where food waste

appears intractable and farm animal welfare is compromised and where the food system in its current form is incompatible with meeting national and global goals for climate and nature. Written by a food policy insider, this book discusses what a single country can do to tackle these problems and contribute to wider change. The book is grounded in a right to food perspective and describes both the necessity of and the opportunity for a repurposing of the food system from a focus on commodity production and trade to a focus on nutrition, equity, and environmental restoration. It challenges some of the faulty maps still in use which are a poor guide to food system change, such as the idea that Scotland's priority is to feed the world, that food redistribution has a significant impact on either waste or poverty, or that educating people to make better choices is an effective strategy. It argues for more assertive governance of Scotland's food system, both by national and local governments, using the new duties set out in Scotland's 2022 Good Food Nation Act. This should include active engagement of civil society in keeping with the Scottish approach of collaborative policymaking. The book focuses on Scotland's food policy journey while recognising the transferability of this experience to other subnational contexts, drawing on the author's experience as a key participant in that journey over the last 15 years. This book will be of great interest to students, scholars, and policymakers interested in food and agricultural policy, as well as those interested in sustainable food systems, public health, and social policy more widely.
