Judith Rich Harris

Nurture Assumption:

The Nurture Assumption Judith Rich Harris, 1999 Harris takes on the experts and boldly questions conventional wisdom of parents' role in their children's lives asserting that it's not the home environment that shapes children but the environment they share with their peers

The Nurture Assumption Judith Rich Harris, 2009-02-24 This groundbreaking book a Pulitzer Prize finalist and New York Times notable pick rattled the psychological establishment when it was first published in 1998 by claiming that parents have little impact on their children's development In this tenth anniversary edition of *The Nurture Assumption* Judith Harris has updated material throughout and provided a fresh introduction Combining insights from psychology sociology anthropology primatology and evolutionary biology she explains how and why the tendency of children to take cues from their peers works to their evolutionary advantage This electrifying book explodes many of our unquestioned beliefs about children and parents and gives us a radically new view of childhood

Leading Mind Peter Hey, 2019-02-14 With his blend of engineering and the fields of personal transformation Peter Hey takes us on a deep yet accessible journey into the inner recesses of our minds He presents a unique model of the mind and the mechanisms that define our behavior Based on his own personal experiences as the son of a Holocaust survivor his sessions with his own clients and his background in computer design he brings the concept of programs in our unconscious as the basic mechanism that determines our actions Millions of programs operating below our everyday awareness each of them associated with emotions that in fact are the actual power behind our decisions in daily life *Leading Mind* explains how these programs are created from all our experiences starting already at conception through our time in the mother's womb all the way to full adulthood It also shows how when accessing our deep unconscious we discover aspects in us that transcend our current physical life Based on thousands and thousands of sessions done by practitioners around the world with remarkably consistent results across cultures education social status and personal beliefs *Leading Mind* shows how the current events that are impacting our civilization nowadays are the result of our emotional ignorance It brings to light an urgent call to reform our educational curriculum to teach how our mind works and tools for personal transformation and conflict resolution Understanding our minds brings tolerance and compassion for all It gives us the knowledge to change our limiting behaviors The start of real personal power to direct our lives in the direction that is our

authentic individual expression *Teen Spirit* Paul Howe,2020-11-15 Teen Spirit offers a novel and provocative perspective on how we came to be living in an age of political immaturity and social turmoil Award winning author Paul Howe argues it is because a teenage mentality has slowly gripped the adult world Howe contends that many features of how we live today some regrettable others beneficial can be traced to the emergence of a more defined adolescent stage of life in the early twentieth century when young people started spending their formative developmental years with peers particularly in formal school settings He shows how adolescent qualities have slowly seeped upward where they have gradually reshaped the norms and habits of adulthood The effects over the long haul Howe contends have been profound in both the private realm and in the public arena of political economic and social interaction Our teenage traits remain part of us as we move into adulthood so much so that some now need instruction manuals for adulting Teen Spirit challenges our assumptions about the boundaries between adolescence and adulthood Yet despite a cultural system that seems to be built on the ethos of Generation Me it is not all bad In fact there has been an equally impressive rise in creativity diversity and tolerance within society all traits stemming from core components of the adolescent character Howe's bold and suggestive approach to analyzing the teen in all of us helps make sense of the impulsivity driving society and encourages us to think anew about civic reengagement

Evolution of Morals Carlos Stegmann,2021-06-02 Carlos Stegmann is a civil engineer whose disposition always led him to have a main interest in the multidisciplinary overview of large and complex planning studies a subject on which he accumulated a 40 year experience having acted as coordinator of many such studies It was this disposition this innate tendency always to strive for the composite whole and the application of his experience to the subject of morals which originated the interdisciplinary insights of his thesis of moral evolution which is the subject of this book It is important to stress this interdisciplinary experience for to be able to produce credible results an attempt to explain something as pervasively inclusive as human behavior must include all the manifestations of this behavior from the cognitive to the physiological No other work on human morals offers such an interdisciplinary approach and the inquiry presented in this book may be considered the first of this kind

[Steeped in Blood](#) Frances J. Latchford,2019-08-15 What personal truths reside in biological ties that are absent in adoptive ties And why do we think adoptive and biological ties are essentially different when it comes to understanding who we are At a time when interest in DNA and ancestry is exploding Frances Latchford questions the idea that knowing one's bio genealogy is integral to personal identity or a sense of

family and belonging Upending our established values and beliefs about what makes a family *Steeped in Blood* examines the social and political devaluation of adoptive ties It takes readers on an intellectual journey through accepted wisdom about adoption twins kinship and incest and challenges our naturalistic and individualistic assumptions about identity and the biological ties that bind us sometimes violently to our families Latchford exposes how our desire for bio genealogical knowledge understood as it is by family and adoption experts pathologizes adoptees by posing the biological tie as a necessary condition for normal identity formation Rejecting the idea that a love of the self same is fundamental to family bonds her book is a reaction to the wounds families suffer whenever they dare to revel in their difference A rejoinder to rhetoric that defines adoptees adoptive kin and their family intimacies as inferior and inauthentic *Steeped in Blood*'s view through the lens of critical adoption studies decentres our cultural obsession with the biological family imaginary and makes real the possibility of being family in the absence of blood

[Freaks, Geeks, and Cool Kids](#) Murray Milner,2015-08-20 In *Freaks Geeks and Cool Kids* Second Edition award winning sociologist Murray Milner tries to understand why teenagers behave the way they do The first edition drew upon two years of intensive fieldwork in one high school and 300 written interviews about high schools across the country where he argued that consumer culture greatly impacts the way our youth relate to one another and understand themselves and society Milner now expands on that concept with a new year of fieldwork fifteen years after he began He has uncovered in teens a move away from consumerism and towards the cultural capital of information in a time of social media and standardized tests
