**Sciences de la Terre** Académie des sciences (Paris),2001      **Sciences de la terre** ,1981      **Evolution of Cenozoic Land Mammal Faunas and Ecosystems** Isaac Casanovas-Vilar,Lars W. van den Hoek Ostende,Christine M. Janis,Juha Saarinen,2023-08-08 This volume presents an array of different case studies which take as primary material data sourced from the NOW New and Old Worlds database of fossil mammals The NOW database was one of the very first large paleobiological databases and since 1996 it has been expanded from including mainly Neogene European land mammals to cover the entire Cenozoic at a global scale In the last two decades the number of works that are based in the use of huge databases to explore ecological and evolutionary questions has increased exponentially and even though the importance of big data in paleobiological research has been outlined in selected chapters of general works no volume has appeared before this one which solely focuses on the databases as a primary source in reconstructing the past The purpose of this book is to provide an illustrative volume showing the importance of big data in paleobiological research and presenting a broad array of unpublished examples and case studies The book is mainly aimed to professional palaeobiologists working with Cenozoic land mammals but the scope of the book is broad enough to fit the interest for evolutionary biologists paleoclimatologists and paleoecologists The volume is divided in four parts The first part includes two chapters on the development of large paleobiological databases providing a first hand account on the logic and the functioning of these databases This is a much needed perspective which is ignored by most researchers and users of such databases and even if centered in the NOW database the lessons that can be learned from this part can be extended to other examples After this introductory part the body of the book follows and is divided into three parts patterns in regional faunas large scale patterns and processes and ecological biogeographical and evolutionary patterns of key taxa Each chapter is written by well known specialists in the field with some participation of members of the NOW advisory board The array of selected mammal taxa ranges from carnivores equids ruminants and rodents to the genus Homo The topics studied also include the diversification and radiation of major clades large scale paleobiogeographical patterns the evolution of ecomorphological patterns and paleobiological problems such as evolution of body size or species longevity In most cases the results are discussed in relation to protracted environmental or paleogeographic changes      *Évolution géologique de la terre et ancienneté de l'homme* Alphonse Cels,1924      *L'origine des formes de la terre et des planètes* Emile Belot,1918      **Geodinamica Acta** ,1999      Geologie en Mijnbouw ,1968      La géologie comparée Stanislas Meunier,1895      **Russian Émigrés in the Intellectual and Literary Life of Interwar France** Leonid Livak,2010-07-01 In a pioneering exploration of the intellectual and literary exchange between Russian migr s and French intelligentsia in the 1920s and 1930s Leonid Livak provides an impressively comprehensive bibliographic overview of a veritable who s who of Russian intellectuals and literati listing all the material published by Russian migr s or on topics pertaining to them during the period under study Focusing attention on a largely

ignored chapter of European cultural history this volume challenges historical assumptions by demonstrating processes of cultural cross fertilization and illuminates the precedents Russians set for political exiles in the twentieth century A remarkable achievement in scholarship Russian migr s in the Intellectual and Literary Life of Inter War France is a valuable resource for admirers and researchers of French and Russian culture and European intellectual history *The Geology of Spain* Wes Gibbons, Teresa Moreno (Geologist), 2002 **Nouvelles archives** Muséum national d'histoire naturelle (France), 1927 **Annuaire géologique universel et guide de géologue autour de la terre** , 1890 **Archives du Muséum national d'histoire naturelle** , 1926 Documents des laboratoires de géologie de la Faculté des sciences de Lyon Université Claude Bernard.
