Scientific Religion:

A SCIENTIFIC RELIGION Dr. V. MASILAMANI, I get revelations unbidden unexpected Not from the mountain tops caves or rivers But from the rise and fall wisdom and vagaries Of common and uncommon mortals With bright sharp eyes through the dark tunnels I trudge along hitting against the jutting rocks Holding the misty hands of Truth and Beauty Wherever whenever however they lead me *The Big Questions in Science and Religion* Keith Ward,2008-05 Can religious beliefs survive in the scientific age Are they resoundingly outdated Or is there something in them of great importance even if the way they are expressed will have to change given new scientific context These questions are among those at the core of the science religion dialogue An Anglican priest who was once an atheist offers compelling insights into the often contentious relationship between diverse religious views and new scientific knowledge He identifies ten basic questions about the nature of the universe and human life Among these are Does the universe have a goal or purpose Do the laws of nature exclude miracles Can science provide a wholly naturalistic explanation for moral and religious beliefs Has science made belief in God obsolete Are there any good science based arguments for God Ward considers concepts from Buddhism Confucianism Taoism Islam Hinduism Judaism and Christianity while featuring the speculations of cosmologists physicians mathematicians and philosophers *Religion and the Scientific Future* Langdon Gilkey,1981 *Hinduism a Scientific Religion* Pon Kulendiren,2012 Hinduism the Truth is not a sect of a faith or a man made religion The Cosmic Truth of Hinduism is non denominational and universal and its founder is unknown However ancient Rishis and Saints have nurtured and revived it into what it is today Hinduism s basic concept is unique with its link to Cosmic Energy its traditions and culture is also linked to nature A diagram explaining the distribution of Cosmic energy is explained is given in this book Lord Shiva is the Cosmic dancer It is depicted that Brahma is the creator Vishnu the Preserver and Shiva is in charge of evolution for easy understanding by the people This book deals with speculations about the origin of Hinduism and its association with nature The design and energy of the Hindu temple and how the energy is associated with the power of Yantras and Chakras in the human body mantras and their connection with sound waves Solar system and Time Idol Deity worship and rituals etc The book covers the five Ishwarams temples of Shiva Sakthi Karthigeya Vishnu Kannagi in Sri Lanka worshipped by Hindus and Buddhists Hinduism had its origin in the Indus valley civilization The word Hindu is derived from the Indus river and dates back to over 5 000 years or more This book also touches the link between the Hinduism and Buddhism Kannagi Pathini and her worship by Sri Lankan Tamils and Singhalese is also explained in the book **Science and Religion** Gary B. Ferngren,2002-08 Written by distinguished historians of science and religion the thirty essays in this volume survey the relationship of Western religious traditions to science from the beginning of the Christian era to the late twentieth century This wide ranging collection also introduces a variety of approaches to understanding their intersection suggesting a model not of inalterable conflict but of complex interaction Tracing the rise of science from its birth in the medieval West through

the scientific revolution the contributors describe major shifts that were marked by discoveries such as those of Copernicus Galileo and Isaac Newton and the Catholic and Protestant reactions to them They assess changes in scientific understanding brought about by eighteenth and nineteenth century transformations in geology cosmology and biology together with the responses of both mainstream religious groups and such newer movements as evangelicalism and fundamentalism The book also treats the theological implications of contemporary science and evaluates recent approaches such as environmentalism gender studies social construction and postmodernism which are at the center of current debates in the historiography understanding and application of science Contributors Colin A Russell David B Wilson Edward Grant David C Lindberg Alnoor Dhanani Owen Gingerich Richard J Blackwell Edward B Davis Michael P Winship John Henry Margaret J Osler Richard S Westfall John Hedley Brooke Nicolaas A Rupke Peter M Hess James Moore Peter J Bowler Ronald L Numbers Steven J Harris Mark A Noll Edward J Larson Richard Olson Craig Sean McConnell Robin Collins William A Dembski David N Livingstone Sara Miles and Stephen P Weldon

Religion and Scientific Method G. Schlesinger, 1977-09-30 I With the immense success of modern science it has generally become accepted that the only way to acquire knowledge is by the use of the method uniformly practiced by working scientists Consequently the credibility of the claims of religion which seem to be based on belief in revelation tradition authority and the like have been considerably shaken In the face of the serious threat provided by the ascendancy of modern scientific methodology religious thinkers have adopted various defensive attitudes Some have retreated into an extreme position where Theism is completely safe from any attack on it by the use of empirical methods of inquiry maintaining that contrary to appearances religion makes no factual claims whatsoever To be religious they say is to subscribe to a certain value system it is to adopt a set of practices and a given attitude to the meaning and purpose of life without making any assertions about this or that empirical feature of the universe Others wishing to remain more faithful to what religion traditionally meant throughout the ages agree that Theism does make factual claims but that these are so radically different from the kind of claims made by science that it is only right that they should be established by a separate method on its own In matters of faith reliance on widely entrenched tradition and sacred authority is not objectionable according to some

Scientific Religion; Or, Higher Possibilities of Life and Practice Through the Operation of Natural Forces Laurence Oliphant, 1888

Faithful to Science Andrew M. Steane, 2014 Science and religious faith are two of the most important and influential forces in human life yet there is widespread confusion about how or indeed whether they link together This book describes this combination from the perspective of one who finds that they link together productively and creatively The situation is not one of conflict or uneasy tension or even a respectful dialogue Rather a lively and well founded faith in God embraces and includes science and scientific ways of thinking in their proper role Science is an activity right in the bloodstream of a reasonable faith The book interprets theism broadly and engages carefully with atheism while coming from a Christian perspective The aim is to show what science is and what it is not and at

the same time give some pointers to what theism is or can be Philosophy evolution and the nature of science and human life are discussed in the first part of the book questions of origins in the second It is the very mind set of scientific thinking that is widely supposed to be antagonistic to religious faith But such suspicions are too sweeping They misunderstand both faith and science Faith can be creative and intellectually courageous science is not the all embracing story that it is sometimes made out to be It is not that science fails to explain some things but rather it does not explain anything at all on its own It is part of a larger explanation And even explanation has to take a humble place it is not the purpose of life

Science, Religion and Deep Time Lowell Gustafson, Barry Rodrigue, David Blanks, 2022-07-05 This book examines the meaning of religion within the scientific evidence based history of our known past since the big bang While our current major religions are only centuries or millennia old our volume discusses the origins and development of human religious practice and belief over our species existence of 300 000 years The volume also connects the scientific approach to natural and social history with ancient truths of our religious ancestors using new lines of inquiry new technologies new modes of expression and new concepts It brings together insights of natural scientists social scientists philosophers writers and theologians to discuss narratives of the universe The essays discuss that to apprehend religion scientifically or to interpret and explain science theologically the subject must be examined through a variety of disciplinary lenses simultaneously and raise several theoretical philosophical and moral problems With a singular investigation into the meaning of religion in the context of the 13.8 billion year history of our universe this book will be indispensable for scholars and students of religious studies big history sociology and social anthropology philosophy and science and technology studies

Faith Versus Fact Jerry A. Coyne,2016-05-17 A superbly argued book Richard Dawkins author of The God Delusion The New York Times bestselling author of Why Evolution is True explains why any attempt to make religion compatible with science is doomed to fail In this provocative book evolutionary biologist Jerry A Coyne lays out in clear dispassionate detail why the toolkit of science based on reason and empirical study is reliable while that of religion including faith dogma and revelation leads to incorrect untestable or conflicting conclusions Coyne is responding to a national climate in which more than half of Americans don t believe in evolution members of Congress deny global warming and long conquered childhood diseases are reappearing because of religious objections to inoculation and he warns that religious prejudices in politics education medicine and social policy are on the rise Extending the bestselling works of Richard Dawkins Daniel Dennett and Christopher Hitchens he demolishes the claims of religion to provide verifiable truth by subjecting those claims to the same tests we use to establish truth in science Coyne irrefutably demonstrates the grave harm to individuals and to our planet in mistaking faith for fact in making the most important decisions about the world we live in Praise for Faith Versus Fact A profound and lovely book showing that the honest doubts of science are better than the false certainties of religion Sam Harris author of The End of
