The New Zealand Journal of Science and Technology, 1929 Volumes 33 38 Section B include 1949 1955 of New Zealand geological abstracts published by the New Zealand Geological Survey Medieval Science, Technology, and Medicine Thomas F. Glick, Steven John Livesey, Faith Wallis, 2005 Demonstrates that the millennium from the fall of the Roman Empire to the flowering of the Renaissance was a period of great intellectual and practical achievement and innovation This reference work will be useful to scholars students and general readers researching topics in many fields of study including medieval studies and world history **Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures** Helaine Selin, 1997-07-31 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as

well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa *Science, Technology, and Medicine in the Modern Japanese Empire* David G. Wittner, Philip C Brown, 2016-03-22 Science technology and medicine all contributed to the emerging modern Japanese empire and conditioned key elements of post war development As the only emerging non Western country that was a colonial power in its own right Japan utilized these fields not only to define itself as racially different from other Asian countries and thus justify its imperialist activities but also to position itself within the civilized and enlightened world with the advantages of modern science technologies and medicine This book explores the ways in which scientists engineers and physicians worked directly and indirectly to support the creation of a new Japanese empire focussing on the eve of World War I and linking their efforts to later post war developments By claiming status as a modern internationally engaged country the Japanese government was faced with having to control pathogens that might otherwise not have threatened the nation Through the use of traditional and innovative techniques this volume shows how the government was able to fulfil the state s responsibility to protect society to varying degrees Chapter 14 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
