**Reconstructions of Secondary Education** John Gray, Andrew McPherson, David Raffe, 2012-05-16 British secondary education has changed in major ways since 1945 This book examines some consequences and implications of both change and stability drawing on a unique series of national surveys of school leavers in Scotland The authors provide an empirical and theoretical account of central problems of contemporary schooling Their analysis covers certification curriculum and selection the effects of educational expansion trends in educational inequality the impact of comprehensive reorganisation truancy and alienation from schooling the explanation of differences in performance between schools and the implications for the public accountability of schools From these analyses the authors develop a critique of the theory of the education system that underpinned expansion They examine this theory's logical and empirical status as myth and elaborate how the political system and social science might jointly overcome some of the methodological difficulties that beset social and educational research

*Gender, Policy and Educational Change* Sheila Riddell, Jane Salisbury, 2003-05-20 Gender equality has been a major educational theme for the past two decades and has become interwoven with other policy themes including those of marketisation and managerialism Contributors to this strong collection are key researchers in their fields and seek to address the following questions What patterns are discernible in the educational attainment of girls and boys over the past two decades To what extent are changes attributable to gender equality policies What form have gender equality policies taken in different parts of the UK What has been the impact of European equality policies How have gender equality policies been experienced by particular groups including pupils from ethnic minority and working class backgrounds This book aims to take an overall look at how significant have been the changes in experiences aspirations and culture of girls and boys and male and female teachers It explores how attempts to improve equal opportunities in education have fared and examines the tensions and contradictions in recent policies

Cultural Roots of British Devolution Michael Gardiner, 2021-06-24 This book presents a provocative argument which suggests that cultural devolution preceded and indeed forced political change A post British form of culture as found across literature education and philosophy has long been in the making arising especially in local communities who no longer see themselves as British The author places this change in the context of post imperial Britain in the second half of the 20th century and looks at how underground cultures such as rave and reggae may have laid the foundations for a post British culture The various attempts to re constitutionalise Britain are explored and the book ends with two key questions

how has the progress of a post British culture been viewed in Scotland and how do we pull a post British England out of a devolutionary process which is liable to outstrip all British control Key Features The first serious account of the history of the growing cultural division within Britain in the second half of the 20th century Accentuates the cultural roots of devolution bringing them out from the shadow of party political explanations Looks at the effects of devolution upon both Scottish and English culture

**Education's Abiding Moral Dilemma** Sheldon Rothblatt,2007-05-14 The conflict between access and quality in education has been front page news for decades Policies regarding the role of elite universities the organisation of secondary education admissions criteria courses of study high stakes testing and fiscal and programme accountability have changed with uncommon frequency resulting in confusion and uncertainty Yet it is the argument of this book that the tension between access to education and the preservation of quality is another chapter in the much longer history of merit selection in England Scotland and America and should be seen in its proper contexts The underlying cause of the difficulties however is the dilemma created by two competing conceptions of virtue one determined by merit judged competitively and the other more vaguely but emotionally supported by a broader view of worth Merit is consistent with liberal democracy but worth is the special province of social democracy None of the distinctions is easily categorised by political party or ideology They are the result of opposite moral impulses inherent in plural democratic societies undergoing the strains of internal and global competition
