The Mendelssohns John Michael Cooper, Julie D. Prandi, 2002 This is a compendium of scholarship concerning the lives works and receptions of Felix Mendelssohn Bartholdy and Fanny Hensel Representing the latest work of leading specialists from the USA France Great Britain and Italy the essays are organized according to a number of issues that have become vital during the past 20 years sources and source problems including the disposition of missing and lost works issues of musical identity as they pertain to little known concert arias and editorial issues presented by the organ preludes op 37 studies of individual works including Felix Mendelssohn s first composition the Scottish and Reformation symphonies and Die erste Walpurgisnacht problematic repertoires Felix s occasional works song cycles and opera plans the relationships between Felix and Fanny and issues of reception history including Felix s influences as composer of organ music and string quartets and gender and race in biographical studies of Felix [The Invention of 'Folk Music' and 'Art Music'](#) Matthew Gelbart, 2007-10-11 We tend to take for granted the labels we put to different forms of music This study considers the origins and implications of the way in which we categorize music Whereas earlier ways of classifying music were based on its different functions for the past two hundred years we have been obsessed with creativity and musical origins and classify music along these lines Matthew Gelbart argues that folk music and art music became

meaningful concepts only in the late eighteenth and early nineteenth centuries and only in relation to each other He examines how cultural nationalism served as the earliest impetus in classifying music by origins and how the notions of folk music and art music followed in conjunction with changing conceptions of nature and changing ideas about human creativity Through tracing the history of these musical categories the book confronts our assumptions about different kinds of music
