Scream Team:

The Collective Edge Colin M. Fisher, 2025-08-28 Essential reading for creators builders and leaders DANIEL H PINK author of Drive A deep dive into the dynamics of successful teams ADAM GRANT author of Think Again A phenomenal science backed guide KATY MILKMAN author of How to Change We live in an age of unprecedented individualism We seek individualistic solutions to our problems but we can rarely explain failures and successes by looking at one person s actions or fix things entirely on our own Our lives are shaped by groups as wide ranging as work teams friends and families nationalities and religions and our tendency toward cooperation is the foundation of human accomplishment Nearly every scientific discovery world changing business desert island musical album and legendary sports team has a great group at its core In his revelatory book Dr Colin Fisher a foremost expert on group dynamics demonstrates how to harness the amazing power of groups to achieve great things under the right conditions Fisher skilfully weaves together the latest science with vivid storytelling He demonstrates how to build happy groups that cooperate effectively how to harness the motivating power of competition without getting embroiled in conflict and avoid the pitfalls of conformity The Collective Edge is a ground breaking book that will transform your understanding of human behaviour Whether you want to change yourself your team or the world you need to work with the invisible forces of group dynamics rather than being unwittingly pushed around by them By doing so you can learn to make better decisions form happier groups that are more than the sum of their parts and improve the quality of your interactions with others forever changing how you live and work for the better Parallel Agile - faster delivery, fewer defects, lower cost Doug Rosenberg, Barry Boehm, Matt Stephens, Charles Suscheck, Shobha Rani Dhalipathi, Bo Wang, 2020-01-03 From the beginning of software time people have wondered why it isn t possible to accelerate software projects by simply adding staff This is sometimes known as the nine women can t make a baby in one month problem The most famous treatise declaring this to be impossible is Fred Brooks 1975 book The Mythical Man Month in which he declares that adding more programmers to a late software project makes it later and indeed this has proven largely true over the decades Aided by a domain driven code generator that quickly creates database and API code Parallel Agile PA achieves significant schedule compression using parallelism as many developers as necessary can independently and concurrently develop the scenarios from initial prototype through production code Projects can scale by elastic staffing rather than by stretching schedules for larger development efforts Schedule compression with a large team of developers working in parallel is analogous to hardware acceleration of compute problems using parallel CPUs PA has some similarities with and differences from other Agile approaches Like most Agile methods PA gets to code early and uses feedback from executable software to drive requirements and design PA uses technical prototyping as a risk mitigation strategy to help sanity check requirements for feasibility and to evaluate different technical architectures and technologies Unlike many Agile methods PA does not support design by refactoring and it doesn t drive designs from unit tests Instead PA uses a minimalist

UML based design approach Agile ICONIX that starts out with a domain model to facilitate communication across the development team and partitions the system along use case boundaries which enables parallel development Parallel Agile is fully compatible with the Incremental Commitment Spiral Model ICSM which involves concurrent effort of a systems engineering team a development team and a test team working alongside the developers The authors have been researching and refining the PA process for several years on multiple test projects that have involved over 200 developers The book s example project details the design of one of these test projects a crowdsourced traffic safety system
