

## Entering information into Workbooks

### Types of data

There are three main types of data that you'll enter into a spreadsheet

#### Product

Apples  
Pears  
Bananas  
Apricots  
Mangos

#### January

2,500  
1,500  
1,800  
1,350  
800

3	January
4	2,500
5	1,500
6	1,800
7	1,350
8	800
9	
10	7,900

### Text

It is automatically aligned to the left unless you change the alignment formatting. You are allowed to combine text and numbers in a cell.

### Values

Values is the name used for numbers in Excel, and they are right aligned when first entered. There is no need to type in things like \$ signs, or commas or decimal places, or % signs. You can do all that later when we have a look at formatting.

### Formulas

We have typed a formula in the active cell (see left).

=B4+B5+B6+B7+B8

Formulas always begin with "=", and they use cell references to add the information together.

### Entering data

Once data is typed into a cell, it must be entered. If you don't enter the information you will notice that half of the buttons on the toolbar and most of your menu options are not available to you to use.

Press Enter

Press Tab

Press Ctrl + Enter

Press an arrow key

Click on the tick in the formula bar

**Important**

### What a cell contains

	A6			Food & Vegetables
1	Household Budget for John Smith			
2				
3	Financial Year to date			
4				
5	Food & Veg	140		

	B1			
1	Household Budget for John Smith			
2				
3	Financial Year to date			

A cell can hold a lot more information than it may show, or print out. If you click on a cell where you cannot see all the contents (like A6 above & left), you'll notice that the contents of the cell are shown in the "Formula Bar". To see this information on the screen, you need to increase the width of the column.

Although it looks like there is something written in cell B1 (left) you can see that the text in it is simply overflowing from A1.
