Virtual Reality, Holograms and Light Projections Jenna Ng, 2025-10-01 Screens are ubiquitous today Yet contemporary screen
media eliminate the presence of the screen and diminish the visibility of its boundaries As the image becomes
indistinguishable from the viewer's surroundings this unsettling prompts re-examination of how screen boundaries
demarcate Through readings of three media forms Virtual Reality holograms and light projections this book develops new
theories of the surfaces on and spaces in which images are displayed Interrogating contemporary contestations of reality
against illusion it argues that the disappearance of difference reflects shifted conditions of actuality and virtuality in
understanding the human condition These shifts further connect to the current state of politics by way of their distorted truth
values corrupted terms of information and internalizations of difference The Post Screen Through Virtual Reality Holograms
and Light Projections thus thinks anew the image's borders and delineations evoking the screen boundary as an
instrumentation of today's intense virtualizations which do not tell the truth In the process a new imagination for images
emerges for a gluttony of the virtual for new conceptualizations of object and representation materiality and energies media
