Musical Thought at IRCAM Tod Machover, 1984 First Published in 1984 Routledge is an imprint of Taylor Francis an informa company **Musical Thought at IRCAM. Contemporary Music Review; 1/1** T. Machover, 1984

Contemporary Music Review, 1984 **The Musical Thought and Spiritual Lives of Heinrich Schenker and Arnold Schoenberg** Matthew Arndt, 2017-09-11 This book examines the origin content and development of the musical thought of Heinrich Schenker and Arnold Schoenberg One of the premises is that Schenker's and Schoenberg's inner musical lives are inseparable from their inner spiritual lives Curiously Schenker and Schoenberg start out in much the same musical spiritual place yet musically they split while spiritually they grow closer The reception of Schenker's and Schoenberg's work has sidestepped this paradox of commonality and conflict instead choosing to universalize and amplify their conflict Bringing to light a trove of unpublished material Arndt argues that Schenker's and Schoenberg's conflict is a reflection of tensions within their musical and spiritual ideas They share a particular conception of the tone as an ideal sound realized in the spiritual eye of the genius The tensions inherent in this largely psychological and material notion of the tone and this largely metaphysical notion of the genius shape both their musical divergence on the logical technical level in theory and composition including their advocacy of the Ursatz versus twelvetone composition and their spiritual convergence including their embrace of Judaism These findings shed new light on the musical and philosophical worlds of Schenker and Schoenberg and on the profound artistic and spiritual questions with which they grapple **Music in the Late Twentieth Century**

Richard Taruskin, 2006-08-14 The universally acclaimed and award winning Oxford History of Western Music is the eminent musicologist Richard Taruskin's provocative erudite telling of the story of Western music from its earliest days to the present Each book in this superlative five volume set illuminates through a representative sampling of masterworks the themes styles and currents that give shape and direction to a significant period in the history of Western music Music in the Late Twentieth Century is the final installment of the set covering the years from the end of World War II to the present In these pages Taruskin illuminates the great compositions of recent times offering insightful analyses of works by Aaron Copland John Cage Milton Babbitt Benjamin Britten Steve Reich and Philip Glass among many others He also looks at the impact of electronic music and computers the rise of pop music and rock n roll the advent of postmodernism and the contemporary music of Laurie Anderson John Zorn and John Adams Laced with brilliant observations memorable musical analysis and a panoramic sense of the interactions between history culture politics art literature religion and music this book will be essential reading for anyone who wishes to understand this rich and diverse period **The Musical Quarterly** Oscar George Sonneck, 1992

Brio, 1985 *Timbre Composition in Electroacoustic Music* Simon Emmerson, 2019-07-23 First Published in 1994 The contributions to this collection have been selected to define a range of interests from the technical aesthetic cognitive and compositional spheres The book addresses the continuing need for musicologists psychologists composers and listeners to

enter into a creative dialogue with designers and builders who are usually programmers in the contemporary world The collection as a whole will help to demonstrate the great potential for exchange between the multidisciplinary approaches to music

Cool Math for Hot Music Guerino Mazzola, Maria Mannone, Yan Pang, 2016-10-26 This textbook is a first introduction to mathematics for music theorists covering basic topics such as sets and functions universal properties numbers and recursion graphs groups rings matrices and modules continuity calculus and gestures It approaches these abstract themes in a new way Every concept or theorem is motivated and illustrated by examples from music theory such as harmony counterpoint tuning composition e.g. classical combinatorics dodecaphonic composition and gestural performance The book includes many illustrations and exercises with solutions

The Language Electroacoustic Music Simon Emmerson, 1986-12-03 Since the inception of electroacoustic music in 1948 much has been written about technical developments This book is one of the first to examine aesthetic issues central to this rapidly developing genre It brings together composers from leading academic departments and studios in Britain the United States Canada and Paris with a wide range of approaches and opinions resulting in a study which is likely to have a marked impact on current debates on the future of electroacoustic music The book is divided into three sections The first Culture and Language considers the relationship between music and the listener's perception and expectation Materials and Language looks at the types of materials available to composers and the way in which the internal structure of the sound can have implications for the overall structure of a piece The final section The Influence of New Technology considers the relationship between computer systems and the music they are helping to create
