Music Sounded Out Alfred Brendel, 1990 Celebrated pianist examines subjects central to his extensive repertoire

Ludwig van Beethoven , Schubert's Fingerprints: Studies in the Instrumental Works Susan

Wollenberg, 2016-04-01 As Robert Schumann put it Only few works are as clearly stamped with their author's imprint as his This book explores Schubert's stylistic traits in a series of chapters each discussing an individual fingerprint with case studies drawn principally from the piano and chamber music The notion of Schubert's compositional fingerprints has not previously formed the subject of a book-length study The features of his personal style considered here include musical manifestations of Schubert's violent nature the characteristics of his thematic material and the signs of his classicizing manner In the process of the discussion attention is given to matters of form texture harmony and gesture in a range of works with regard to the various fingerprints identified in each chapter The repertoire discussed includes the late string quartets the String Quintet the E flat Piano Trio and the last three piano sonatas Developing ideas which she first proposed in a series of journal articles and contributions to symposia on Schubert Professor Wollenberg takes into account recent literature by other scholars and draws together her own researches to present her view of Schubert's compositional personality Schubert emerges as someone exerting intellectual control over his musical material and imbuing it with poetic resonance

Piano Pedagogy Gilles Comeau, 2013-01-11 Piano Pedagogy A Research and Information Guide provides a detailed outline of resources available for research and or training in piano pedagogy Like its companion volumes in the Routledge Music Bibliographies series it serves beginning and advanced students and scholars as a basic guide to current research in the field The book will include bibliographies research guides encyclopedias works from other disciplines that are related to piano pedagogy current sources spanning all formats including books journals audio and video recordings and electronic sources

Beyond the Score Nicholas Cook, 2013 In Beyond the Score Music as Performance author Nicholas Cook supplants the traditional musicological notion of music as writing asserting instead that it is as performance that music is loved understood and consumed This book reconceives music as an activity through which meaning is generated in real time as Cook rethinks familiar assumptions and develops new approaches Focusing primarily but not exclusively on the Western art tradition Cook explores perspectives that range from close listening to computational analysis from ethnography to the study of recordings and from the social relations constructed through performance to the performing and listening body In doing so he reveals not only that the notion of music as text has hampered academic understanding of music but also that it has inhibited performance practices placing them in a textualist straightjacket Beyond the Score has a strong historical emphasis touching on broad developments in twentieth century performance style and setting them into their larger cultural context Cook also investigates the relationship between recordings and performance arguing that we do not experience recordings as mere reproductions of a performance but as performances in their own right Beyond the Score is a

comprehensive exploration of new approaches and methods for the study of music as performance and will be an invaluable addition to the libraries of music scholars including musicologists music theorists and music cognition scholars everywhere

Transforming Music Education Estelle R. Jorgensen, 2008-12-01 Brilliant important reading for those who teach music who write the curricular plans for teaching it and who guide prospective teachers to the profession It is a must read for it awakens thoughts about why we teach and how Patricia Shehan Campbell This quintet of essays examines the reasons why music education should be transformed investigates the nature of education and musical transformation and suggests alternative educational models and strategies Estelle Jorgensen frames her argument for new approaches against the backdrop of historical musical and educational practice and draws on literature from various fields Transforming Music Education is addressed to current and future music teachers those who train them and all who are interested in revolutionizing music education

Music Affect at Work Christine Mary Bezat, 1999 *Theory Into Practice* Nicholas Cook, Peter Johnson, Hans Zender, 1999 The central theme of this book is the relationship between the reflections about and the realization of a musical composition In his essay Words about Music or Analysis versus Performance Nicholas Cook states that words and music can never be aligned exactly with one another He embarks on a quest for models of the relationship between analytical conception and performance that are more challenging than those in general currency Peter Johnson's essay Performance and the Listening Experience Bach's *Erbarme dich* shows that a performance is an element within the intentionality of the work itself He looks for scientific methods capable of proving the artisticity of a performance And the composer Hans Zender in his *A Road Map for Orpheus* states that a composer must be capable of questioning obvious basic principles such as equal temperament and finding creative solutions
