Internationalization of Industry Silvio Borner,2012-12-06 About 10 years ago the first very small steps towards this book were taken The starting point was marked by the deep and sudden slump of the Swiss economy in the mid seventies a crisis wiping out about 10 percentage points of GNP and employment within just two years To this writer it was clear from the beginning that neither the exogenous shocks nor the structural changes were in fact exogenous or structural They were given and shaped by global forces They were part and parcel of capitalist development There is no other highly developed country in the world

which is so extremely and integrally exposed to world wide currents of financial and economic changes as Switzerland The degree and dimensions of openness of the Swiss economy led to the formulation of our research approach for studying the internationalization of the economy a topic theoretically and politically developed in this book Empirical evidence relates to our study of Swiss experience A well known Swiss American economist offered the following comment on our previous work on the internationalization of industry You are very good in raising interesting questions What was undoubtedly meant as a criticism was received as a compliment Too much talent and too many research efforts are in my opinion wasted by research programs which place technique over substance This unfortunate development in our profession has already greatly reduced the social utility of economists
