Deprivation to Social Exclusion John Welshman, 2007-09-13 This book explores the history of debates over transmitted deprivation and their relationship with current initiatives on social exclusion It examines the content and background to Sir Keith Joseph's famous cycle of deprivation speech of 1972 and traces the direction taken by the DHSS SSRC Research Programme **Social Exclusion** Byrne, David, 2005-06-01 This book explores developments in social theory social experience and social policy in relation to Social Exclusion It examines the origins of the term and implications of the difference between the ideas of exclusion underclass residuum and related concepts The discussion is informed by the application of Complexity Theory *Class, Politics, and the Decline of Deference in England, 1968-2000* Florence Sutcliffe-Braithwaite, 2018 In late twentieth century England inequality was rocketing yet some have suggested that the politics of class was declining in significance while others argue that class identities lost little power Neither interpretation is satisfactory class remained important to ordinary people's narratives about social change and their own identities throughout the period 1968-2000 but in changing ways Using self narratives drawn from a wide range of sources the raw materials of sociological studies transcripts from oral history projects Mass Observation and autobiography the book examines class identities and narratives of social change between 1968 and 2000 showing that by the end of the period class was often seen as an historical identity related to background and heritage and that many felt strict class boundaries had blurred quite profoundly since 1945 Class snobberies went underground as many people from all backgrounds began to assert that what was important was authenticity individuality and ordinariness In fact Sutcliffe Braithwaite argues that it is more useful to understand the cultural changes of these years through the lens of the decline of deference which transformed people's attitudes towards class and towards politics The study also examines the claim that Thatcher and New Labour wrote class out of politics arguing that this simple and highly political narrative misses important points Thatcher was driven by political ideology and necessity to try to dismiss the importance of class while the New Labour project was good at listening to voters particularly swing voters in marginal seats and echoing back what they were increasingly saying about the blurring of class lines and the importance of ordinariness But this did not add up to an abandonment of a majoritarian project as New Labour reoriented their political project to emphasize using the state to empower the individual **Qualitative and Mixed Methods Data Analysis Using Dedoose** Michelle Salmons, Eli Lieber, Dan Kaczynski, 2019-08-16 Qualitative and Mixed Methods Data Analysis Using Dedoose A Practical Approach for Research Across the Social Sciences provides both new and experienced researchers with a guided introduction to dealing with the methodological complexity of mixed methods and qualitative inquiry using Dedoose software The authors use their depth of experience designing and updating Dedoose as well as their

published research to give the reader practical strategies for using Dedoose from a wide range of research studies Case study contributions by outside researchers provide readers with rich examples of how to use Dedoose in practical applied social science and health settings

The Pragmatics of Governmental Discourse Ayan-Yue Gupta,2024-08-02 This book presents a novel methodological framework for analysing governmental discourse It involves combining pragmatist perspectives on language with computational sociolinguistics and large language models LLMs The first half discusses traditional critical approaches to investigating discursive practices principally those employing Critical Discourse Analysis CDA and those based on methods developed by Michel Foucault These are critiqued in terms of pragmatist views on meaning which are rarely taken up in this area It is argued that to understand the grounding of social structures and power relations in discourse we must begin with a systematic account of how meaning is contextually fixed It is proposed that a pragmatist reading of Foucault s arguments about governmentality offers a productive framework for discourse analysis To illustrate the advantages of this framework the book presents a case study of the British government s adoption of resilience sustainability and wellbeing discourses in the period 2000 2020 A dataset of 179 million tokens sampled from approximately 170 000 government documents is used to illustrate how this framework can be combined with natural language processing NLP to make robust inferences This study will be of interest to both sociologists interested in language and in the methodological potential of recent developments in NLP Importantly the book demonstrates how LLMs can be harnessed to bring new perspectives to long standing sociological questions

Adaptation in the Age of Media Convergence Johannes Fehrle,Werner Schäfke-Zell,2025-10-01 This collection considers new phenomena emerging in a convergence environment from the perspective of adaptation studies The contributions take the most prominent methods within the field to offer reconsiderations of theoretical concepts and practices in participatory culture transmedia franchises and new media adaptations The authors discuss phenomena ranging from mash ups of novels and YouTube cover songs to negotiations of authorial control and interpretative authority between media producers and fan communities to perspectives on the fictional and legal framework of brands and franchises In this fashion the collection expands the horizons of both adaptation and transmedia studies and provides reassessments of frequently discussed BBC s Sherlock or the LEGO franchise and previously largely ignored phenomena self censorship in transnational franchises mash up novels or YouTube cover videos
