New Internationalism

Brian J.R. Stevenson

New Internationalism:

Canada, Latin America, and the New Internationalism Brian J.R. Stevenson,2000-12-06 In *Canada Latin America and the New Internationalism* Brian Stevenson argues that Canada's foreign policy toward Latin America has been profoundly affected by these three factors and has evolved in response to both changing domestic demands and shifting international circumstances By analysing a pivotal period in Canada Latin American relations he shows us how successive Canadian governments made important initiatives toward closer relationships with Latin America and were also pressured by non governmental organizations to play a bigger role in the region Canada's increased role can be seen in official foreign policy commitments such as the decision to join the Organization of American States and in policy decisions on political refugees He explains that while the United States has played a key role in sometimes constraining Canadian foreign policy in the region it is important to realize that Canadian foreign policy has been steadied by a long standing tradition of internationalism Canada Latin America and the New Internationalism demonstrates that the tradition of internationalism in Canadian foreign policy as viewed from the perspective of foreign policy analysis provides the framework within which to understand and accommodate changes in its policy toward Latin America The period which the book explores is critical in order to understand the contemporary nature and future direction of Canada Latin America relations

Globalization, Social Movements, and the New Internationalism Peter Waterman,2010-06-15 In a political climate where loose talk of a third way passes for political idealism Waterman's passionate book examines the possibilities for a new style global solidarity suited to complex capitalist modernity The author examines the past internationalism of Labour and socialists and the present one of radical democratic social movements discussing how the Left might build on this experience to recover a humanist and emancipatory tradition of internationalism which would address our multiple global social problems

Journal of Proceedings and Addresses of the ... Annual Meeting and International Congress on Education Held at ... National Education Association of the United States,1915

The Codes of the Global in the Twenty-first Century Anna Maria Guasch,2017-12-22 At the start of the twenty first century the contemporary implies a clear desire to affirm a type of art that is expanding across the globe challenging old geographical borders and reclaiming narratives of place and displacement in other words new cultural practices that transfigure the relationship between the global and the local and articulate the discourse of difference Being in the place of here and now working with others in simultaneous and specific practice and contemplating the production of work in the experience of connection means raising the value of the performative aspect of practice and displacing the reflective role of cultural production In the new cartography of this multifarious global art the author who combines theoretical and curatorial discourse with creative practice defines how global concepts circulate from the critical analysis of transnational contemporary art to the global

[China Turns to Multilateralism](#) Guoguang Wu,2007-09-12 China's recent rapid economic growth has drawn global attention to its foreign policy which increasingly has had an impact on world politics

In contrast with China's long standing preference for bilateralism or unilateralism in foreign policy recent decades have seen changes in the PRC's attitude and in its declaratory and operational policies with a trend toward the accepting and advocating of multilateralism in international affairs. Whilst China's involvement has been primarily in the economic arena for example participation in the World Trade Organization and ASEAN Plus Three it has more recently expanded into international security institutions such as the Shanghai Cooperation Organization. This book records, analyzes and attempts to conceptualize this phenomenal development in Chinese foreign policy and its impact on international relations with the emphasis on China's active participation in multilaterally oriented regional security regimes. Written by an impressive team of international scholars this book is the first collective effort in the field of China studies and international relations to look at China's recent turn to multilateralism in foreign affairs. It will appeal to students and scholars of Chinese politics and foreign policy, security studies and international relations.

Feminism and the Periodical Press, 1900-1918 Lucy Delap, Maria DiCenzo, Leila Ryan, 2006. The Edwardian period experienced a particularly vibrant periodical culture with phenomenal growth in the numbers of titles published that were either aimed specifically at women or else saw women as a key section of their readership or contributor group. It was an era of political ferment in which a number of progressive traditions were formulated, shaped or abandoned including socialism, feminism, modernism, empire politics, trade unionism and welfarism. Organized around some of the central themes of political thought and utopian thinking, this impressive collection gathers together classic articles from key periodicals. The set presents a comprehensive sourcebook of readings on Edwardian Progressive era feminist thought, exploring the intervention of the radical public intellectuals working in these traditions in North America and the UK from 1900-1918.
