

Abstract by the Translator of the Chinese Translation of Neurotopology

Neurotopology traces the evolution of every aspect and every branch from culture and technology to literature and art and the [East Chinese and] Western cultures, the work as a work of scientific philosophy, being an attempt at reaching from brain regions to a neurotopological world, which requires the knowledge of various natural sciences and social sciences. Neurotopology tries to solve the interdisciplinary problems that neurotopology appears in natural sciences, mathematics, social sciences, literature, quantum dynamics, artificial intelligence, learning systems, neural networks, and so on. In such a methodology to promote their development and improvement, for the East Chinese countries of the world, the work is intended to provide some proper books, materials, philosophy and scientific mathematics, the basis on the basis of neurotopology research, and the basis on the new generation of classical brain mathematics, to theoretically support all the natural science, literature, mathematics, psychology, sociology and health in science, philosophy, social mathematics, administrative science, artificial intelligence, system science and other fields with joint or independent development.
