Neurohumoral Coding Of Brain Function:

Neurohumoral Coding of Brain Function R. Myers, 2013-03-13 It is indeed a pleasure to welcome all of you to this International Symposium on the Neurohumoral coding of Brain Function Many of you have undertaken a very long trip in order to cross swords with some of the most fascinating issues in all of the neurosciences Of particular satisfaction in this instance is the geographical representation of the sciences with individuals here from Europe and the Americas South Central and North As we do battle so to speak with each of the questions raised during the next several days we should remember that the problems faced by each of our fields are exceptionally difficult In a way this difficulty stems from two related facts 1 we are trying to construct a conceptual bridgework between one discipline and another and 2 the distance between the research fabric of any two of these disciplines is vast It would probably not be unfair to say that a large number of scientists feel relatively contented in remaining within the boundaries of their own area of specialization In a sense that is certainly justifiable today primarily because of the intensity of such specialization However the participants of this symposium who reflect some of the major thrusts in biochemistry physiology pharmacology and psychology have in the main chosen to explore the pathways that cross the interface between mind and body between behavior and brain
