Time-Series Observations of Ocean Acidification: a Key Tool for Documenting Impacts on a Changing Planet Abed El Rahman Hassoun,Adrienne J. Sutton,Sam Dupont,Jose Martin Hernandez-Ayon,Xianghui Guo,2025-04-15 Ocean acidification is a global phenomenon with local effects Marine ecosystems are facing multiple stressors leading to significant changes Time series observations are the basis to understand these changes and distinguishing between natural and anthropogenic variability of physical chemical and biological components of marine environments Moreover field monitoring is often neglected as a tool to document the responses of marine organisms and key habitats to ocean acidification Time series observations of ocean acidification are thus critical to understanding the current threats that the ocean s ecosystems are witnessing and efficiently developing and implementing adaptation and mitigation solutions Time series dedicated to observing ocean acidification other stressors as well as biological parameters are the baseline for long term assessment of the ocean s health and for evaluating the efficiency of local and global actions toward achieving climate targets Therefore the goal of this Research Topic is to highlight the latest research efforts conducted to document ocean acidification patterns and trends and their consequences on marine life In this issue we will focus on new and old time series stations efforts to bridge physical chemical and biological observations and their application for modeling and future projections Fish Invasions of the Mediterranean Sea Daniel Golani,Brenda

Appelbaum-Golani,2010 Biological invasions are one of the major factors affecting ecosystems throughout the world The Mediterranean Sea is one of the most dynamic marine ecosystems in the world and is subject to ongoing invasions of marine organisms This book focuses on fish invasions of the Mediterranean and presents the latest research on this subject This comprehensive book includes chapters written by experts on paleontology climate change zoogeography genetics parasitology biological monitoring and conservation as well as chapters devoted to regional and local issues of countries surrounding the Mediterranean written by experts from those countries The editors of this book Dr Daniel Golani and Brenda Appelbaum Golani of the Hebrew University of Jerusalem have conducted ichthyological research for over three decades and have published numerous books and articles on fish invasions and biodiversity Monthly Catalogue, United States Public Documents ,1991 Notice to Mariners ,1952 The Ancient Mediterranean Sea in Modern Visual and Performing Arts Rosario Rovira Guardiola,2017-12-14 When thinking about the Mediterranean Fernand Braudel s haunting words resound like an echo of the sea and its millenary history From Prehistory until today the Mediterranean has been setting witness and protagonist of mythical adventures of encounters with the Other of battles and the rise and fall of cultures and empires of the destinies of humans Braudel s appeal for a long dur e history of the Mediterranean challenged traditional views that often present it as a sea fragmented and divided through periods This volume proposes a journey into the bright and dark sides of the ancient Mediterranean through the kaleidoscopic gaze of artists who from the Renaissance to the 21st century have been inspired by its myths and history The view of those who imagined and recreated the past of the sea has largely contributed to the shaping of modern cultures which are inexorably rooted and embedded in Mediterranean traditions The contributions look at modern visual reinterpretations of ancient myths fiction and history and pay particular attention to the theme of sea travel and travellers which since Homer s Odyssey has become the epitome of the discovery of new worlds of cultural exchanges and a metaphor of personal developments and metamorphoses General examination of the Mediterranean Sea, a summary of its winds, currents, and navigation compiled by A.
