Melanesian Religion:

Religions of Melanesia Garry Trompf, 2006-09-30 Melanesia boasts over one quarter of the world's distinct religions and presents the most complex religious panorama on earth. The region is famous for its unusual new religious movements that have adapted traditional beliefs to modernity in surprising ways. As the first bibliographical survey to comprehensively cover the entire region, *Religions of Melanesia* is an invaluable research aid for anyone interested in this growing field. Trompf's work is a complete listing of scholarly publications and provides readable and concise descriptions that will clearly guide the researcher toward the most relevant sources. This survey covers 2188 entries organized topically and regionally. Trompf covers such subjects as traditional and modern belief systems and the emergent indigenous Christianity that has taken root. Regional coverage includes Irian Jaya, Papua New Guinea, Solomon Islands, Vanuatu, New Caledonia, and Fiji.

Melanesian Religion G. W. Trompf, 1991 This is the first general survey to cover the entire field of Melanesian religion. The book starts with traditional religious experience, examines the introduction of Christianity and the missions, and the indigenous response to colonialism, cargo cultism, and independent churches. It concludes with the impact of modernization on religious belief and practice. This differs from other books in treating the full range of Melanesian religious experience rather than concentrating solely on anthropological or Christian aspects. It deals with Melanesian society and Papua New Guinea in particular, practices, religious activities, and beliefs from a religious rather than ethnographic viewpoint, but will appeal to readers with a spread of interests and approaches.

Traditional Religion in Melanesia Theo Aerts, 1998 There are various modern methods of an audience-centered reading of the Scriptures. One of them is an anthropology-inspired approach which assumes that people from these parts of the world come to the Bible with quite a different set of presuppositions grounded in their own age-old traditions. This kind of approach goes purposely away from the well-established kind of reading which is based upon past Jewish history, ancient Near Eastern customs, and archaeology, Semitic philology, and so on. But without denying the value of these essentially sound segments of learning, is it really necessary that Melanesians should first plunge into Western academia in order to hear God's word? Or is it no longer true that Greeks must not first become Jews before they can become Christians? The articles gathered in *Traditional Religion in Melanesia* and its companion volume, *Christianity in Melanesia*, contribute to the goal just described. They make clear that religion as such was not something that was completely new for the pagans of the past and that as a rule too they were rather selective in accepting the Christian message. This accounts for some misunderstandings but also for some very positive ways of accepting Christianity.

Melanesians and Missionaries Darrell L. Whiteman, 2002-05-10 In *Melanesians and Missionaries*, one of the best of the younger generation of missionary anthropologists demonstrates that a commitment to the missionary enterprise on the part of a solid scholar facilitates rather than hinders the anthropological study of a missionary topic. This is better anthropology because Dr. Whiteman is able to probe more deeply into his topic and

demonstrates that he understands and appreciates both Melanesians and missionaries Charles H Kraft Professor of Anthropology School of World Mission Fuller Theological Seminary Pasadena *Payback* G. W. Trompf,1994-07-14 In this ambitious study the first monograph on religion and the logic of retribution Professor Trompf shows how various aspects of payback both negative and positive provide the best indices to an understanding of Melanesian views of life The book explores the reasons why people pay back and opens up a whole new dimension in the cross cultural study of human consciousness The author conducts his readers through the most complex anthropological pageant on earth illustrating his arguments from western New Guinea to Fiji

Carrier,1992 Melanesian societies like village societies in many parts of the world are frequently portrayed as existing in a timeless traditional present The effects of this view are seen not only in overall popular and academic understandings of these societies but also in more abstract debates within anthropology about the nature of kinship exchange or social organization History and Tradition in Melanesian Anthropology offers an alternative view from authors who believe that historical evidence can and must inform our understanding of contemporary cultures This collection of original essays brings together scholars in anthropology and history They point out ways in which the timeless traditionalism approach of anthropology is inadequate Life in the existing societies of Melanesia cannot be understood they say without taking firmly into account how these societies are shaped by their interactions with Western influences In different ways all the contributors bring the history of Melanesian societies into their analyses whether discussing the generally dismissive attitude of ethnographers toward the large numbers of Melanesian Christians the ethnocentrism that led European observers to interpret fighting among the Melanesians solely according to whether it was for or against the Europeans or the mechanism by which a practice such as kerekere the soliciting of goods or services in Fijian society became
