The Chairs for Women in Science and Engineering Program Caroline D'Amours,Hannah Young,Catherine

Mavriplis,2024-04-10 This book describes the origins and evolution of Canada's 30 year Natural Sciences and Engineering Research Council Chairs for Women in Science and Engineering Program The book starts literally with a bang right as Montreal and all of Canada were rocked by the 1989 Ecole Polytechnique Massacre of 14 women describing how the Chair program took on a frenetic pace as a single Chairholder Monique Frize tried to respond to an entire country's concerns about women in engineering both as students and as professionals The authors first cover the program from 1989 through 1997 when the program was expanded to five regional Chairs of which there have been over three generations by now The book then provides synopses of each Chairholder's comprehensive regional program to recruit retain and advance girls and women in STEM organized by generation providing a unique historical view of the changing landscape for research and outreach programs to increase the participation of women in male dominated scientific fields Readers will find an effective model for national programs addressing equity diversity and inclusion in STEM and be inspired by the 16 strong role models who pioneered blended careers in STEM and gender equity advocacy

Building The Life of A Woman Engineer

Katherine Kehres,2021-05-04 While engineering may typically be regarded as a more male dominated industry women can absolutely find success within the vastly technical seemingly scientific and often contractual profession Katherine Kehres is just one example of a wife a mother and an engineer who maintains overwhelming satisfaction for the life she has constructed Her persistence can be credited for navigating what others might find intimidating and she sometimes considers frustrating Crafted with an aim to change the perceptions and misconceptions Building the Life of a Woman Engineer is mostly a memoir maybe a self help and hopefully an inspiration A key purpose of its design is in bringing awareness to and acceptability for engineering both as an educational pursuit and as a career field for girls to strive toward and women to thrive in Katherine details her growth resilience and dedication over the years despite originally assuming that engineering was only for men dads and nerds She accentuates how the occupation actually encompasses traits and values beyond the baseline affinity for math and science And the insight and lessons provided function as guidance for those pondering whether they or a friend or a family member could also find engineering interesting and incredibly rewarding No matter where anyone is within their own individual and unique journey the reflections on personal and professional experiences are anticipated to help everyone be less naive and more knowledgeable Concurrently big picture ideas serve as reassurance that all are in control of building their own life project even when it is paved with challenges and obstacles So whether you have a desire to one day find your own niche you already hold a critical role or you are simply a champion for the importance and essentiality of engineers your encouragement and camaraderie are welcomed in the engineering community
