Mind Morality And Explanation Selected Collaborations:

Mind, Morality, and Explanation Frank Jackson, Philip Pettit, Michael A. Smith, 2023 This volume collects the best of the work of Frank Jackson Philip Pettit and Michael Smith showcasing their contributions to philosophical psychology the theory of psychological and social explanation moral theory and moral psychology [A Companion to the Philosophy of Action](#) Timothy O'Connor, Constantine Sandis, 2012-08-02 A Companion to the Philosophy of Action offers a comprehensive overview of the issues and problems central to the philosophy of action The first volume to survey the entire field of philosophy of action the central issues and processes relating to human actions Brings together specially commissioned chapters from international experts Discusses a range of ideas and doctrines including rationality free will and determinism virtuous action criminal responsibility Attribution Theory and rational agency in evolutionary perspective Individual chapters also cover prominent historic figures from Plato to Ricoeur Can be approached as a complete narrative but also serves as a work of reference Offers rich insights into an area of philosophical thought that has attracted thinkers since the time of the ancient Greeks [Human Minds and Cultures](#) Sanjit Chakraborty, 2024-03-29 This book puts forward a harmonious analysis of similarities and differences between two concepts human minds and cultures and strives for a multicultural spectrum of philosophical explorations that could assist them in pondering the striking pursuit of envisaging human minds and cultures as an essential appraisal of philosophy and the social sciences The book hinges on a theoretical understanding of the indispensable liaison between the dichotomy of minds and objectivity residing in semantic ontological conjectures The ethnographic sense of cultures confines the scope of cultural scientism an evolutionary paradigm on the functionalist turn where one could enthral the cultural phenomenon from the contentment of the conflict of scientific quandaries Hence cultural relativism concedes that cultures have some descriptive contents like customs beliefs moral codes other minds etc that are followed by an individual or a group of people However the notion of societalsemiotics embarks on the semiotic conception of culture that deploys modernity and values centred on ethical conjectures Human Minds and Cultures conspicuously attune the cultural edifice of moral minds and cope with the enduring prospects of ethics genders laws and socio political affairs Essential reading for anyone with a sparkling interest in human minds and cultures [When Minds Converse](#) Philip Pettit, 2025-02-11 When Minds Converse argues that we do not speak because our human minds are special our minds are special because we can speak It maintains that six capacities characteristic of our species emerge as social skills in conversing with one another and that we internalize those skills in mentally communing with ourselves in thought Philip Pettit defends a society first view of the human mind and more broadly the human soul gesturing at how this philosophical anthropology can support universal ideals of equality respect and freedom Three of the abilities the book targets involve informational processing Our capacity to update our beliefs and other attitudes intentionally seeking out the judgments that we ought to make and the attitudes we ought to hold Our capacity to rely on intentional reasoning looking for

the grounds on which to support judgments and looking at what our judgments in turn support And our ability to direct perception intentionally as we recruit it to the service of those capacities and learn to distinguish between appearance and reality The other three capacities addressed have a relational character Our ability to establish and uphold standards and values for one another and for ourselves making tacit commitments to live by them Our ability to ascribe and assume accountability holding one another and ourselves responsible to those norms and values And our ability to assume the status of persons embracing the implications of those commitments in the persona we hold out to others and indeed to ourselves Pettit offers an empirically informed but philosophical defence of his view In an extended thought experiment a conceptual genealogy he explores the likely unplanned effects that the first appearance of language would have on the minds of humanoid creatures otherwise like us The argument is that they would evolve a range of conversive practices and that the skills elicited by those practices are good models of the capacities targeted here The genealogy does not try to explain how those practices and skills evolved among our forebears but relying on the lessons of the thought experiment seeks to shed light on their nature and role in our social and mental life

Being Reduced Jakob Hohwy, Jesper Kallestrup, 2008-09-04 Is the mind nothing but neural firings in the brain Are we just a bunch of neurons If the mind is just the brain then how can we act as genuine responsible agents in the world *Being Reduced* attempts to understand these questions

Common Minds Geoffrey Brennan, 2007-05-24 *Common Minds* presents papers by some of the most eminent philosophers alive today grappling with some of the themes derived from the larger programme that Pettit has inspired It concludes with a piece by Pettit himself in which he gives an overview of his work and provides commentary on the preceding essays

Economics as a Moral Science Peter Rona, Laszlo Zsolnai, 2017-04-13 The book is reclaiming economics as a moral science It argues that ethics is a relevant and inseparable aspect of all levels of economic activity from individual and organizational to societal and global Taking ethical considerations into account is needed in explaining and predicting the behavior of economic agents as well as in evaluating and designing economic policies and mechanisms The unique feature of the book is that it not only analyzes ethics and economics on an abstract level but puts behavioral institutional and systemic issues together for a robust and human view of economic functioning It sees economic facts as interwoven with human intentionality and ethical content a domain where utility calculations and moral considerations co determine the behavior of economic agents and the outcomes of their activities The book employs the personalist approach that sees human persons endowed with free will and conscience as the basic agents of economic life and defines human flourishing as the final end of economic activities The book demonstrates that economics can gain a lot in meaning and also in analytical power by reuniting itself with ethics

Weakness of Will and Practical Irrationality Sarah Stroud, Christine Tappolet, 2003-09-04 Among the many practical failures that threaten us weakness of will or akrasia is often considered to be a paradigm of irrationality The eleven new essays in this collection written by an excellent international team of philosophers some well established some younger

scholars give a rich overview of the current debate over weakness of will and practical irrationality more generally Issues covered include classical questions such as the distinction between weakness and compulsion the connection between evaluative judgement and motivation the role of emotions in akrasia rational agency and the existence of the will The also include new topics such as group akrasia strength of will the nature of correct choice the structure of decision theory the temporality of prudential reasons and emotional rationality Because these questions cut across philosophy of mind and ethics the collection will be essential reading for scholars postgraduates and upper level undergraduates in both these fields

Hume on Motivation and Virtue Charles Pigden, 2009-11-27 Contemporary ethical thought owes a great deal to David Hume whose work has inspired non cognitivists naturalists and error theorists and stimulated the rival theories of Kant and contemporary Kantians This timely volume assembles an distinguished cast of international scholars to discuss three themes from Hume First Hume s infamous claim that Reason is and ought only to be the slave of the passions which seems to suggest that reason can choose between means but not ends second the Motivation Argument which purports to prove that the rules of morality are not conclusions of our reason and third Hume s treatment of the virtues which is now the focus of renewed philosophical interest The contributors discuss these issues and other matters arising from the Humean agenda OCLC The Philosophical Review Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 2004 **International Who's Who of Authors and Writers 2008** Europa Publications, 2007-08-23 An invaluable source of information on the personalities and organizations of the literary world **Political Questions** Morten Ebbe Juul Nielsen, 2006 Political Questions is a collection of original contributions from a distinguished score of the world s most prominent and influential political philosophers They deal with questions such as what drew them towards the area how they view their own contribution to the field and what the future of political philosophy looks like **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association, 2004 List of members in v 1 **American Book Publishing Record** , 2004 **Forthcoming Books** Rose Arny, 2004 Zeitschrift für philosophische Forschung , 2008 *Kausale Strukturen* Michael Esfeld, Christian Sachse, 2010 **Religious Education** , 1910 Available on microfilm from University Microfilms *British Books* , 1910 **Publishers' Circular and Booksellers' Record of British and Foreign Literature** , 1909
