Interest in film photography and analog photography has also grown enormously among those who only have experience shooting digitally. In *The Film Photography Handbook 2nd Edition*, authors Chris Marquardt and Monika Andrae speak to both types of film photographers as they offer an easy-to-understand complete resource to shooting film. This book is intended for anyone who is curious about film and analog photography, whether you need a refresher course or are discovering this wonderful format for the first time. You'll learn how easy it is to shoot and process black and white film at home and that just a little special equipment is needed to get into film photography. You'll learn all about the important differences between film and digital photography, numerous film cameras, as well as how to buy a second-hand camera. Film formats from 35 mm to medium format and large format, exposure settings, tonal values, and tonal representations in different types of film, from color negatives and slides to the enormous spectrum of black and white films, processing film (covering everything you need to know: equipment, chemicals, and workflow), scanning negatives to bring your analog photography into a digital workflow, both presenting and archiving your prints and negatives.
