Metaphors of Confinement Monika Fludernik,2019-08-13 Metaphors of Confinement The Prison in Fact Fiction and Fantasy offers a historical survey of imaginings of the prison as expressed in carceral metaphors in a range of texts about imprisonment from Antiquity to the present as well as non penal situations described as confining or restrictive These imaginings coalesce into a carceral imaginary that determines the way we think about prisons just as social debates about punishment and criminals feed into the way carceral imaginary develops over time Examining not only English language prose fiction but also poetry and drama from the Middle Ages to postcolonial particularly African literature the book juxtaposes literary and non literary contexts and contrasts fictional and nonfictional representations of imprisonment and discussions about the prison as institution and experiential reality It comments on present day trends of punitivity and foregrounds the ethical dimensions of penal punishment The main argument concerns the continuity of carceral metaphors through the centuries despite historical developments that included major shifts in policy such as the invention of the penitentiary The study looks at selected carceral metaphors often from two complementary perspectives such as the home as prison or the prison as home or the factory as prison and the prison as factory The case studies present particularly relevant genres and texts that employ these metaphors often from a historical perspective that analyses development through different periods

Our Wild Niche Laurie Cookson, 1999. Wouldn't it be great to be wild? To be so natural and free that we could do whatever we want? But we can't. If our species went wild, the results could be very unpleasant. We might lose control. Our species has allowed itself to become artificial in its efforts to be careful and considerate. But what if we have made a mistake and miss the real value of wildness? In nature, not all animals are evolving, but all of them are wild. Why? Evolution is survival of the wildest, not survival of the fittest. Being wild allows an animal to become efficient in its niche. Wild species flourish in natural diversity and harmony. How do they do it? *Our Wild Niche* explores what it is to be wild, the obstacles that stand in the way of our being wild, and the human traits that will come forward when we finally do reach our wild niche. It also shows how the wildness links everything together into a sensible and complete package that will give new insight into the role of our human emotions, feelings, instincts, adaptations, and desires.
