Mathematical Reflections:

Mathematical Reflections Peter Hilton, Derek Holton, Jean Pedersen, 2012-12-06 Focusing Your Attention The purpose of this book is at least twofold First we want to show you what mathematics is what it is about and how it is done by those who do it successfully We are in fact trying to give effect to what we call in Section 9.3 our basic principle of mathematical instruction asserting that mathematics must be taught so that students comprehend how and why mathematics is done by those who do it successfully I However our second purpose is quite as important We want to attract you and through you future readers to mathematics There is general agreement in the so called civilized world that mathematics is important but only a very small minority of those who make contact with mathematics in their early education would describe it as delightful We want to correct the false impression of mathematics as a combination of skill and drudgery and to re-inforce for our readers a picture of mathematics as an exciting stimulating and engrossing activity as a world of accessible ideas rather than a world of incomprehensible techniques as an area of continued interest and investigation and not a set of procedures set in stone

Musings of the Masters Raymond G. Ayoub, 2004-06-01 The anthology is a collection of articles contiguous to the humanities written by renowned mathematicians of the twentieth century The articles cover a variety of topics that for want of a better name shall be referred to as humanistic An important criterion thereby limiting the choice is that the articles should be accessible to the literate reader who may or may not have technical knowledge of mathematics The articles span roughly a century in time and a wide range in subject They are by mathematicians acknowledged by their peers as outstanding creators whose work has added richly to the discipline Each article is preceded by a brief biographical sketch of the author and a brief indication of the content The material is accessible to a wide audience lay as well as academic

Mathematical Reflections Titu Andreescu, Maxim Ignatiuc, 2020-12-30 *Mathematical Vistas* Peter Hilton, Derek Holton, Jean Pedersen, 2013-06-29 Focusing Your Attention We have called this book *Mathematical Vistas* because we have already published a companion book *Mathematical Reflections* in the same series 1 indeed the two books are dedicated to the same principal purpose to stimulate the interest of bright people in mathematics It is not our intention in writing this book to make the earlier book a prerequisite but it is of course natural that this book should contain several references to its predecessor This is especially but not uniquely true of Chapters 3 4 and 6 which may be regarded as advanced versions of the corresponding chapters in *Mathematical Reflections* Like its predecessor the present work consists of nine chapters each devoted to a lively mathematical topic and each capable in principle of being read independently of the other chapters Thus this is not a text which as is the intention of most standard treatments of mathematical topics builds systematically on certain common themes as one proceeds 1 *Mathematical Reflections* In a Room with Many Mirrors Springer Undergraduate Texts in Mathematics 1996 Second Printing 1998 We will refer to this simply as MR 2 There was an exception in MR Chapter 9 was concerned with our thoughts on the doing and teaching of mathematics at the undergraduate level **Mathematical**
