Mathematical Reasoning for Elementary Teachers (7th Edition)

Description :

Long/De Temple/Millman's Mathematical Reasoning for Elementary Teachers presents the mathematical content needed for teaching within the context of the elementary classroom, giving future teachers the motivation they need while also showing them the bigger picture of when they will use and teach the concepts. The program endeavors to answer the frequently-asked question "Where are we learning this?" by going beyond skill explanations and showing the ways that these concepts are implemented in the future classroom and what types of questions children may ask. Now updated to include the Common Core State Standards for Mathematics, the text imparts mathematical reasoning skills, a deep conceptual understanding, and a positive attitude to those who aspire to be elementary or middle school teachers. ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering

A Mathematical Foundation for Elementary Teachers Patricia Jones, Kathleen D. Lopez, Lee Ellen Price, 1997-08 This text was written in response to the recommendations of A Call to Change and the vision of the NCTM Standards Its goals are to present important challenging mathematics relevant to a Standards based K 8 curriculum and to prepare prospective elementary teachers to implement the Standards in their own classrooms Students acquire an understanding of mathematics that is considerably broader than that which they will be required to teach They develop number sense spatial sense and mathematical intuition and are able to explain mathematical concepts relationships and processes clearly and correctly This text helps the future teacher to see elementary school mathematics as a Big Picture in which important interconnected ideas are developed and applied from K through 8 They learn from experience that mathematical understanding begins with concrete models and then progresses through verbal numerical and finally abstract stages As a result they become confident successful problem solvers and develop an appreciation for the power and beauty of mathematics and an enthusiasm for teaching it Mathematics for Elementary Teachers with Activities, Sybilla Beckmann, 2017-01-10 For courses in Math for Future Elementary Teachers Empowering Tomorrow's Math Teachers Mathematics for Future Elementary Teachers with Activities 5th Edition connects the foundations of teaching elementary math and the why behind procedures formulas and reasoning so students gain a deeper understanding to bring into their own classrooms Through her text Beckmann teaches mathematical principles while addressing the realities of being a teacher With in class collaboration and activities she challenges students to be actively engaged An inquiry based approach to this course allows future teachers to learn through exploration and group work leading to a deeper understanding of mathematics Known for her contributions in math education Beckmann writes the leading text for the inquiry approach in Mathematics for Elementary Teachers with Activities students engage explore discuss and ultimately reach a true understanding of mathematics Beckmann's text covers the Common Core State Standards for Mathematics CCSSM now implemented in most states However states not following Common Core will not find the information intrusive in the text Also available with MyLab Math MyLab Math is an online homework tutorial and assessment program designed to work with this text to engage students and improve results The Skills Review MyLab Math provides review and skill development that complements the text helping students brush up on skills needed to be successful in class The MyLab Math course doesn't mirror the problems from the text but instead covers basic skills needed prior to class eliminating the need to spend valuable class time re-teaching basics that students should already know This enables students to have a richer experience in the classroom while working through the book activities and problems In addition to basic skills review the MyLab Math course includes a wealth of resources to help students visualize the concepts and understand how they come into play in an elementary classroom These includes IMAP videos Responding to Students Videos eManipulatives and brand new Common Core videos Demonstration videos and GeoGebra
