Supporting Early Mathematical Development Caroline McGrath, 2025-10-14 Supporting Early Mathematical Development is an essential text combining theory and practice to enable successful mathematical education for children from birth to 12 years. New chapters include the following: Mediators of Mathematical Thinking, Understanding Pattern, Pre-Algebraic and Algebraic Thinking, Naming, Renaming, and Processing Numbers, Statistics, Statistical Diagrams, and Probability Measure, Geometry. Throughout the book, Caroline McGrath navigates the complexity of teaching and learning mathematics through careful thought and consideration of mediators of mathematical thinking. analysis of National Curriculum test data from more than 600 children of 10 11 and 13 14 years of age as well as in depth  
interviews with 250 of these as they attempt to solve test problems in order to explore the nature of the difficulties children  
experience with realistic items The book shows by comparing test and interview data that many children as a consequence of  
their confusion over the requirements of realistic test items fail in tests to demonstrate mathematical knowledge and  
understanding that they actually possess The book also explores whether this problem of invalid measurement is equally  
spread across children from different social backgrounds and across the sexes The book will be of interest to academics and
