**The School of Montaigne in Early Modern Europe** Warren Boutcher, 2017-03-09 This major two volume study offers an interdisciplinary analysis of Montaigne s Essais and their fortunes in early modern Europe and the modern western university Volume one focuses on contexts from within Montaigne s own milieu and on the ways in which his book made him a patron author or instant classic in the eyes of his editor Marie de Gournay and his promoter Justus Lipsius Volume two focuses on the reader writers across Europe who used the Essais to make their own works from corrected editions and translations in print to life writing and personal records in manuscript The two volumes work together to offer a new picture of the book s significance in literary and intellectual history Montaigne s is now usually understood to be the school of late humanism or of Pyrrhonian scepticism This study argues that the school of Montaigne potentially included everyone in early modern Europe with occasion and means to read and write for themselves and for their friends and family unconstrained by an official function or scholastic institution For the Essais were shaped by a battle that had intensified since the Reformation and that would continue through to the pre Enlightenment period It was a battle to regulate the educated individual s judgement in reading and acting upon the two books bequeathed by God to man The book of scriptures and the book of nature were becoming more accessible through print and manuscript cultures But at the same time that access was being mediated more intensively by teachers such as clerics and humanists by censors and institutions by learned authors of past

and present and by commentaries and glosses upon those authors Montaigne enfranchised the unofficial reader writer with liberties of judgement offered and taken in the specific historical conditions of his era The study draws on new ways of approaching literary history through the history of the book and of reading The Essais are treated as a mobile transnational work that travelled from Bordeaux to Paris and beyond to markets in other countries from England and Switzerland to Italy and the Low Countries Close analysis of editions paratexts translations and annotated copies is informed by a distinct concept of the social context of a text The concept is derived from anthropologist Alfred Gell s notion of the art nexus the specific types of actions and agency relations mediated by works of art understood as indexes that give rise to inferences of particular kinds Throughout the two volumes the focus is on the particular nexus in which a copy an edition an extract is embedded and on the way that nexus might be described by early modern people Bulletins Et Mémoires de la Société Médicale Des Hôpitaux de Paris ,1924 **French Books III & IV (FB) (2 vols.)** Andrew Pettegree, Malcolm
