Production System Models of Learning and Development David Klahr, Pat Langley, Robert Neches, 1987 Cognitive psychologists have found the production systems class of computer simulation models to be one of the most direct ways to cast complex theories of human intelligence There have been many scattered studies on production systems since they were first proposed as computational models of human problem solving behavior by Allen Newell some twenty years ago but this is the first book to focus exclusively on these important models of human cognition collecting and giving many of the best examples of current research In the first chapter Robert Neches Pat Langley and David Klahr provide an overview of the fundamental issues involved in using production systems as a medium for theorizing about cognitive processes emphasizing their theoretical power The remaining chapters take up learning by doing and learning by understanding discrimination learning learning through incremental refinement learning by chunking procedural learning and learning by composition A model of cognitive development called BAI RN is described and a final chapter reviews John Anderson s ACT theory and discusses how it can be used in intelligent tutoring systems including one that teaches LISP programming skills In addition to the editors the contributors are Yuichiro Anzai Hokkaido University Japan Paul Rosenbloom Stanford and Allen Newell Carnegie Mellon Stellan Ohlsson University of Pittsburgh Clayton Lewis University of Colorado Boulder Iain Wallace and Kevin Bluff Deakon University Australia and John Anderson Carnegie Mellon David Klahr is Professor and Head of the Department of Psychology at Carnegie Mellon University Pat Langley is Associate Professor Department of Information and Computer Science University of California Irvine and Robert Neches is Research Computer Scientist at University of Southern California Information Sciences Institute Production System Models of Learning and Development is included in the series Computational Models of Cognition and Perception edited by Jerome A Feldman Patrick J Hayes and David E Rumelhart A Bradford Book [Production System Models of Learning and Development](#) David Klahr, Pat Langley, Robert Neches, 1987 **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70
